# Activities

## This Week's Eruptions

Name: _____ Date: _____

Where are volcanoes erupting right now on the planet? You'll find out in this Planet Diary activity.

### Directions

- Check out this week's volcanic activity report. For this activity, choose any six of this week's eruptions (only one per country).
- Click the link to each volcano for details of its eruption. Use the information to complete the first three columns of the Workspace table. For *Eruption Features*, list the features of the eruption (for example, lava flow, ash cloud, mudflow, or pyroclastic flow).
- Refer to this tectonics plate map to complete the last column.
- Look at the locations of the volcanoes relative to tectonic plate boundaries. What pattern do you notice?

### Workspace

| Volcano Name | Eruption Features | Country | Tectonic Plates |
|---|---|---|---|
| | | | |
| | | | |
| | | | |
| | | | |
