## Lewis and Clark Journal

Name: _____ Date: _____

When Lewis and Clark set out from St. Louis in 1804, little did they know the expedition would be so well remembered more than 200 years later. In this Planet Diary activity, you'll record your own journal entries as you ride with Lewis and Clark across the Wild West.

### Directions

- Go to Lewis and Clark in Montana: A Geologic Perspective. Scroll to the map of sites visited by Lewis and Clark. Explore the photos of landforms and other geologic features. Read the journal entries.
- Use the information to write your own journal entry for each location on the Workspace table. Include your observations about how the landforms change along the way. Which geologic features stand out the most at the different locations?

### Workspace

| Location | Journal Entries |
|---|---|
| Culbertson | |
| White Cliffs of the Missouri | |
| Great Falls of the Missouri | |
| Gates of the Mountains | |
| Three Forks of the Missouri | |
| Beaverhead Rocks | |
