MSDA Quick-Start Guide

In EasyBridge, confirm that both **enVision Mathematics** and **SuccessMaker Math** products have been added to the class.

Teachers: Assigning the Screener

1. Navigate to Realize

2. From the home page, select your class

3. In the left menu, click **Programs** and click on enVision Mathematics

4. From the table of contents, select **Mathematics Screener and Diagnostic Assessments**

5. Select the **Screener Assessment**

6. Select the **leveled Screener Assessment** in the left menu to access the Assign button

7. Click **assign**

8**.** Complete the **Create Assignment** screen with **Start** date, **Due** date, **Assign to**, and click **Assign**.
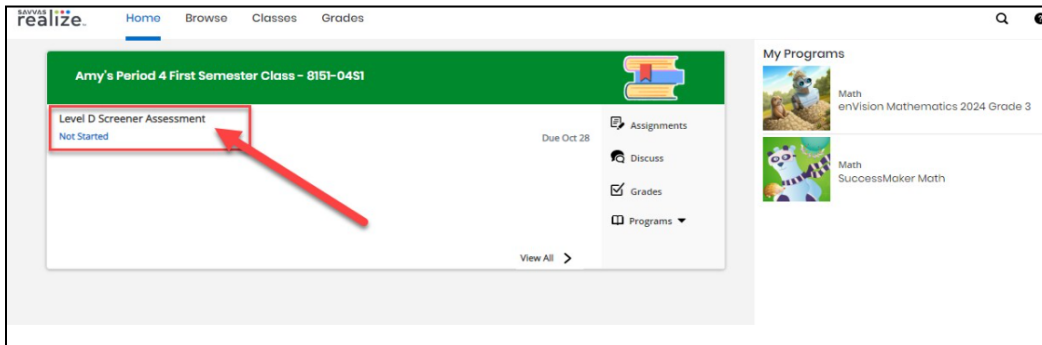

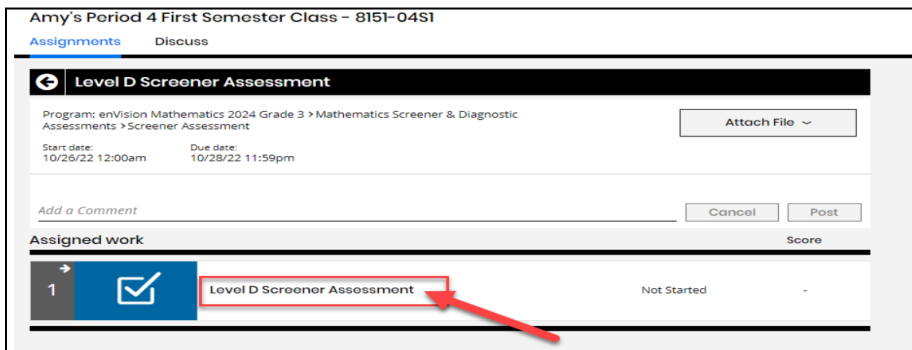

Students: Log in and complete Screener

1. Log into EasyBridge and navigate to Realize

2. From Home page, click on the **Screener Assessment**

3. Select the **Leveled Screener Assessment**

4. Select **Start**

Teachers: Interpreting Screener Results to Manually Assign Diagnostic

Scoring the Screener is a **manual process** that **must** be completed prior to assigning the Diagnostic. Using the cut scores on the **Diagnostic Recommendation Table**, determine the appropriate level Diagnostic to assign to each student.

Diagnostic Recommendation Table

Grade & Screener Levels	Cut Score	Recommended Diagnostic Assessment	
		Less Than Cut Score	Greater Than or Equal to Cut Score
Kindergarten Level A	--	All students should be assigned the Level A Diagnostic Assessment.	
Grade 1 Level B	50% (10 out of 20)	Level A Diagnostic Assessment	Level B Diagnostic Assessment
Grade 2 Level C	45% (10 out of 22)	Level B Diagnostic Assessment	Level C Diagnostic Assessment
Grades 3-5 Levels D-F	40% (10 out of 25)	Prior-grade level Diagnostic	On-grade level Diagnostic (matches the Screener level)
Grades 6-8 Levels G-I	36% (11 out of 30)	Prior-grade level Diagnostic	On-grade level Diagnostic (matches the Screener level)

For example, a student in Grade 3 scoring a 40% (10 out of 25) on the Level D Screener Assessment should take the on-grade Level D Diagnostic Assessment. A classmate scoring 36% (9 out of 25) should take the prior-grade Level C Diagnostic Assessment.

Teachers: Assigning Diagnostic Assessment

1. From the home page, select your class

2. In the left menu, select **Programs** and select **enVision Mathematics** program

3. From the table of contents, select **Mathematics Screener and Diagnostic Assessments**

4. Select the correct **level Diagnostic Assessment**

5. Select the **level Diagnostic Assessment** in the left menu to access the Assign button

6. Click **Assign**

7. Complete the **Create Assignment** screen with **Start** date, **Due** date, **Assign to**, and click **Assign**.

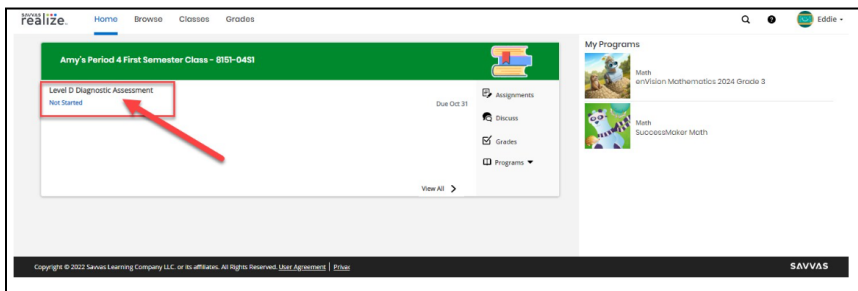

# Students: Complete enVision Mathematics Diagnostic Assessment

1. Log into EasyBridge and navigate to Realize.

IMPORTANT: Students should not select SuccessMaker Math in EasyBridge at this time. Both MSDA assessments should be completed in Realize first.

2. From Home page, click on the **Level Diagnostic Assessment**

3. Click on the **Level Diagnostic Assessment**

4. Select **Start**

5. Click **Submit** when finished

*Diagnostic Assessment results are available immediately. Once students submit the Diagnostic Assessment, it takes **24 hours** for the results to sync with SuccessMaker. After **24 hours**, students can begin working in SuccessMaker.*

Based on the student's score on the Diagnostic assignment, MSDA will generate the initial Math course assignment for the student in SuccessMaker.

IMPORTANT: If teachers try to assign SuccessMaker before students complete the Screener and Diagnostic, they will be prompted with this message:

It's important to note that teachers do not assign any assignments within their SuccessMaker dashboard as it's an automated process that is completed when the MSDA is completed by each student.

*This MSDA Quick-Start Guide does not replace SuccessMaker Professional Development. It is recommended that districts receive SuccessMaker training from a certified learning specialist.
