

Challenge 5

Vocabulary

Directions

1. Navigate to an upcoming topic. Discover and write down all vocabulary words associated with each lesson within the topic. (You can find vocabulary words at the beginning of each lesson.)
2. If you a **K-5 teacher**, write down two activities that you can incorporate into your ELA time block utilizing these science vocabulary words. For example, during an ELA block, students will write a “how-to” writing sample using at least three topic vocabulary words.
If you are a **Middle Grades teacher**, write down how you will cover the Lesson’s vocabulary in your Science classroom.
3. Implement these activities into your classroom learning environment.
4. Blaze a little further by downloading the **Savvas Vocabulary App** (IOS only) for Elevate Science to your IOS device to see if it might be helpful to tell your students about!
