## Career & Technical Education

### MyCulinaryLab Overview

MyCulinaryLab is an online homework, tutorial, and assessment program designed to engage students and improve results. With input from more than 11 million student users annually, MyLab & Mastering creates learning experiences that are truly personalized and continuously adaptive. MyCulinaryLab reacts to how students are actually performing, offering data-driven guidance that helps them better absorb course material and understand difficult concepts. A powerful homework and test manager lets you create, import, and manage online homework assignments, quizzes, and tests that are automatically graded. The online gradebook automatically tracks your students' results on tests, homework, and practice exercises and gives you control over managing results and calculating grades.

Highlights of this fully integrated learning program include:

**Pearson Kitchen Manager** This valuable resource for Culinary Students and Chefs features a vast collection of recipes tested in the kitchens of top culinary schools. Powered by an extensive ingredient database, Pearson Kitchen Manager allows users to simply perform tasks such as recipe scaling, recipe costing, recipe conversion, and other essential applications.

**Video Demonstrations** Over 150 Video Demonstrations walk students through the proper techniques they'll need to succeed in the exciting field of Culinary Arts.

**Learning Modules** Organized by chapter and learning objective for convenient assignability, these self-guided tutorials provide students with a scaffolded learning path. Learning Modules feature integrated chapter content, engaging Video Demonstrations, and Knowledge Check questions to prepare students for the kitchen.

**Dynamic Study Modules** Help students study effectively on their own by continuously assessing their activity and performance in real time.

**Chapter Resources** To help you prepare for class, you will find the following in every chapter: homework assignments, quizzes, videos, and lecture PowerPoints.

**Math Problem Sets** Instructors told us that many students come to class with a poor understanding of the math they need to use in the kitchen. Students can now practice their math skills outside of class by completing pre-built Problem Sets for the math topics that are covered in OnCooking and OnBaking.
