## Career & Technical Education

### MyITLab Overview

MyITLab is the most innovative and personalized way to teach and learn digital literacy and productivity skills needed for college and career success. MyITLab offers quality content developed by practicing IT educators, effectively integrated into training and assessment exercises to enhance students' knowledge of Microsoft Office applications and computer concepts.

#### **Highlights of this interactive program include:**

Realistic, high-fidelity, skill-based training and assessment scenarios.

Project Creation Tool – Create Grader Projects from scratch, and assign and score using MyITLab Grader.

Learning Design – MyITLab is designed with the learner in mind, helping students transfer what they learn in the classroom to the workplace, promoting career readiness.

Open Badges – MyITLab is excited to offer open badges from Acclaim, a badging platform that validates students have obtained certain Microsoft Office skills by scoring 90% or above on an

Application Capstone Grader Project.

MOS Practice Exams – MOS (Microsoft Office Specialist) Certification Practice Exams in MyITLab are simulation exams that can be taken by students as many times as needed until they feel confident they are ready for the official exam
