MyProgrammingLab Overview

Through the power of practice and immediate personalized feedback, MyProgrammingLab will improve your students' performance. Highlights of this Fully Integrated Learning Program include:

Programming Practice With MyProgrammingLab, your students will gain first-hand programming experience in an interactive online environment.

Immediate, Personalized Feedback MyProgrammingLab provides students with intelligent, immediate, personalized feedback by mining our large database of submissions to provide student-specific responses.

Dynamic Roster Your students' submissions are automatically evaluated, both saving you time, and offering students immediate learning opportunities. The color-coded roster gives you a quick glance of your classes' progress. Easily drilldown to receive information on a single student's performance or submissions for a specific problem.

Graduated Complexity MyProgrammingLab breaks down problems into short, understandable sequences of exercises, where each sequence relates to a particular topic. Within each sequence the level and sophistication of the exercises increase gradually but steadily.

Video Note Tutorials These step-by-step video tutorials enhance the programming concepts presented in select Pearson textbooks by allowing students to view the entire problem-solving process outside of the classroom—when they need help the most.
