How students change courses in MyLab® and Mastering®

Note: Students are not prompted for a new access code if the new course is based on the same book/author/edition as the previous one.

1 Students should log into their MyLab/Mastering dashboard and click on, “Enroll in a Course,” and enter in the new course id.

2 After the student enrolls in the new course, the previous teacher must then change the student's status to inactive in the original course. To do so, launch the MyLab/Mastering Roster roster:

3 Select the Active Status and make the student Inactive in the original course. This will remove the original course tile from the student's dashboard and also remove them from the original teacher's gradebook.
