

SAVVAS Count On™ California TK Mathematics

Family Engagement

Family Engagement helps support student learning beyond the classroom.

Welcome to Count on California TK Mathematics Family Engagement!

Family Engagement resources have been designed to help caregivers, parents, family and community members support student learning beyond the classroom.

Let's explore the resources available that will help equip you with strategies and tools that will engage your student.

Topic Support

WELCOME

Thank you for working with your child's teacher and with us, the authors of **Savvas Count On™ California TK Mathematics**, to advance your child's learning. This is important to us, and we know it is to you.

Savvas Count On™ California was specifically designed for California classrooms, aligned with the California Framework's vision and the California Preschool/Transitional Kindergarten Learning Foundations while providing a bridge to the Kindergarten California Common Core Standards.

Savvas Count On™ California was developed to help children see the math. Your child will engage in hands-on activities, collaborative learning opportunities, and joyful discovery in an interactive, rich mathematics classroom environment.

Savvas Count On™ California includes resources to help families see the math as well. Family Engagement provides information needed to stay involved in your child's mathematical growth.

TOPICS

View topic-level resources. Look at the overview of each topic's content for opportunities to connect mathematics learned in the classroom with home, games, helpful vocabulary terms, and more. Click on a topic below to go directly to that topic's resources or use the Topics panel to navigate to the topic you want to view.

- [Topic 1 Sort and Classify Using Attributes](#)
- [Topic 2 Counting Patterns to 5](#)
- [Topic 3 Compare, Add One, Take Away One](#)
- [Topic 4 Geometry and Shapes in Space](#)
- [Topic 5 Geometry: Identify, Describe, and Construct Shapes](#)
- [Topic 6 Counting Patterns to 10](#)
- [Topic 7 Understand Addition and Subtraction](#)
- [Topic 8 Repeating Patterns](#)
- [Topic 9 Measurement: Compare and Order](#)
- [Topic 10 Measure Length](#)
- [Topic 11 Counting Patterns to 30](#)
- [Topic 12 Solving Problems](#)

You'll receive a direct link from your school; no login required.

The Topic Overview previews upcoming content with visuals. Think of a topic as a themed heading focusing on a specific math idea.

Each topic has a focus, so you can engage with your student on the big idea and understand the end learning goal. For example, in Topic 2, your student is learning counting patterns to 5.

Multiple ways are presented to help your student understand the concepts. Use the Connect the Math section to tie the math to everyday experiences, helping them connect the big idea to the world around them.
