Hi, teachers! Today we'll go over how to use the Groups feature on Pearson Realize™. Creating groups is a quick and easy process and will help you differentiate instruction for your students.

Over the next few minutes, I'll show you the steps for creating a group, adding and removing students, and assigning content.

Let’s get started!
Creating a Group

Creating groups helps organize students and makes creating assignments a breeze. You can put students from one class or from different classes into the same group. For example, you can create a Spanish Lessons group, and assign Spanish lessons to students from two classes who need the lessons.

On the Students and Groups page, click **Show groups** to see a list of your groups. You can see this list from any of your classes.

To create a new group click **Create group**. Enter the name of the group and then select **Done**. Your new group will appear in the right-hand sidebar.
Adding Students to a Group

Now it's time to add students to your new group. If you want to add students from multiple classes, you will need to complete this process for each class.

In the right-hand sidebar, click **Manage Students and Groups** under your new group name.

Check the box next to each student you want to add. Then click **Save**.

You will see a notification letting you know the students were added.

Here’s a quick tip: The number icon next to each group name shows you how many students are in a group. Hover over the number to see the names of the students assigned to the group.
Removing a Student from a Group

To remove a student from a group, select **Manage Students and Group** under the group name. Then uncheck the box next to the student you want to remove.

Click **Save**. You will see a notification letting you know the student was removed.
Assigning content to groups follows the same steps as assigning content to classes or students.

Go to the **Programs** tab and navigate to the content you want to assign.

Click **Assign** under the name of the content item.

Enter the assignment information on the left, including the start date and due date and instructions for the students. On the right enter the group name to which you want to assign the content. Select the group name from the list that appears.

**Please note:** If you have students from different classes in one group, you’ll need to select each instance of that group to assign the content to the entire group.

When you’re done creating the assignment, click **Assign.**
Thanks for Watching!

Pearson Realize makes it easy to create and manage your groups and differentiate instruction to meet your students’ needs.
