Getting Started with Savvas Realize
New User Setup and Home Page Navigation

It’s a new school year and your school just bought some new Savvas programs. You want to check out the digital curriculum, but how do you get started? For new users who need a username and password, you’ll need to register first.

You can sign up at SavvasRealize.com!

First, click Sign Up to begin the teacher self-registration process. Check out the EasyBridge Basic tutorials to learn more about Self-registration.

Once you’ve got your new username and password, you’re ready to sign in at SavvasRealize.com. Realize is the platform that houses all of your Savvas digital content.

The first time you sign in to Savvas Realize, need to do a few things before you can start working with your program, like:

- Choose the grade you teach;
- Select your programs;
- Choose how you want your name to look to students; and
- Pick a profile icon and a background image.

Let’s go!
Once you’ve set up all of that, you will see the Realize home page. Click the icons to learn about each area.

- Use the green **Programs** circle to choose a specific program, or to view all programs. You’ll choose which program you want to work with from here.
- Use the orange **Classes** circle to access recent assignments and attachment notifications. This is also where you manage classes, student groups, and class discussions boards.
- Use the blue **Data** circle to view student mastery, progress, and usage data. You can drill down in these charts to get more detail.
- Use the **Search** icon to search for content.
- Use the **Question Mark** to find online training and access Help.
- Use the **Profile** icon to change your user settings, and view announcements about new features. These announcements can also be seen in the **In-App messaging** service.
- When you’re done for the day, don’t forget to **Log Out**.

Now you can dive in to some great digital resources to enhance your teaching and engage your students!
