This is also another place to watch an Introductory Tour of Savvas Realize.</p> <p>The magnifying glass icon allows you to search by key word with your programs.</p> <p>Click tabs at the top to navigate to the following:</p> <ul style="list-style-type: none"> • Browse (to view all program resources) • Classes (to add a class, add students or to view data results) • My Library (to view all your uploaded resources and playlists)

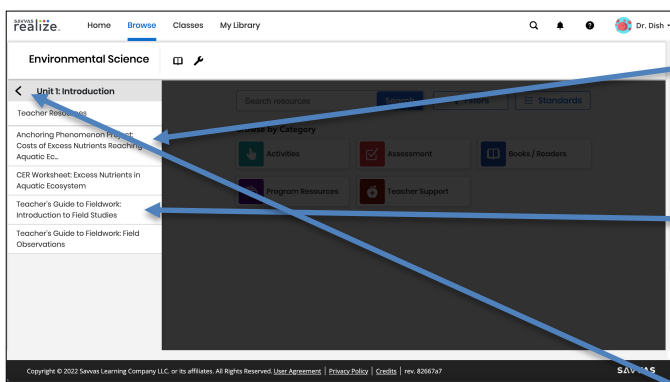

Choose the **Environmental Science** program on the right-hand side.

Once you click into the program, this the program **Table of Contents**. Each **unit** and its corresponding chapters are listed here.

You can access e-texts for both the **Student Edition** and **Teacher Guide** from this page by clicking **e-text**.

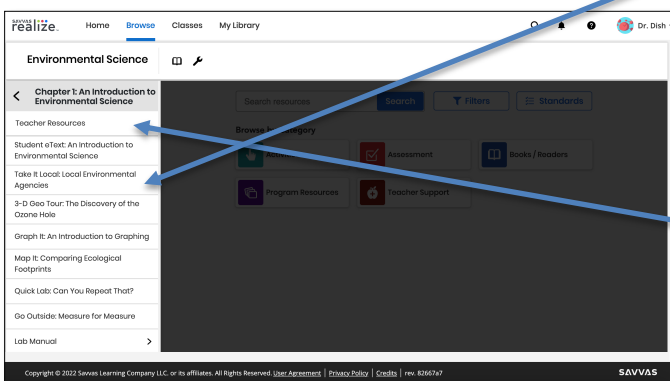

Choose a Unit from the Table of Contents to explore in more detail.

Each unit contains a **Table of Contents** like this one and links to the **Anchoring Phenomenon** launch and **Claim Evidence Reasoning (CER) Worksheet** or **Modeling Activity**, to build on what students discover throughout the unit.

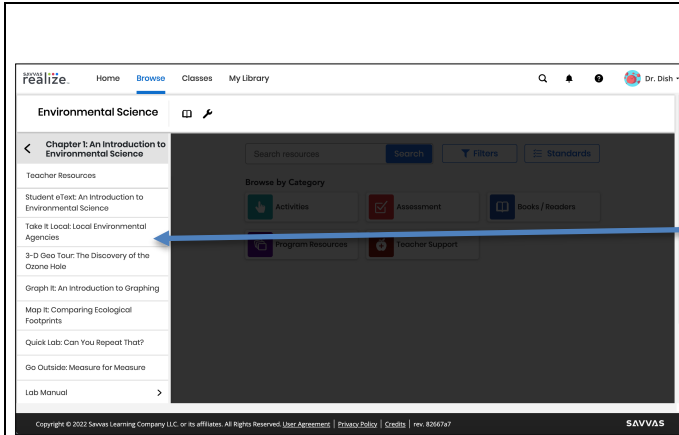

Teacher's Guide to Fieldwork and Field Observations can be found here as well. This helps to guide students to explore natural spaces and deepen their understanding of Environmental Sciences.

Click the **black back arrow** and choose a chapter within the unit.

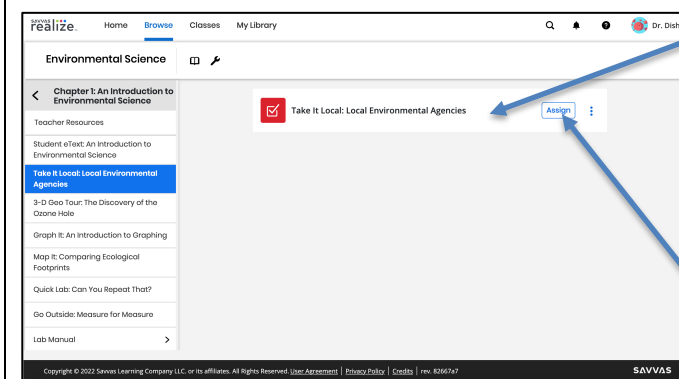

Begin each chapter by introducing the **Investigative Phenomenon** with the **Central Case**. As students investigate more about the phenomenon throughout the chapter, many activities like labs, Geo Tours and Study Worksheets are available to help students connect back to the phenomenon throughout the chapter.

Click **Teacher resources** under any chapter or unit to find additional resources like answer keys, editable materials, and lesson plans.

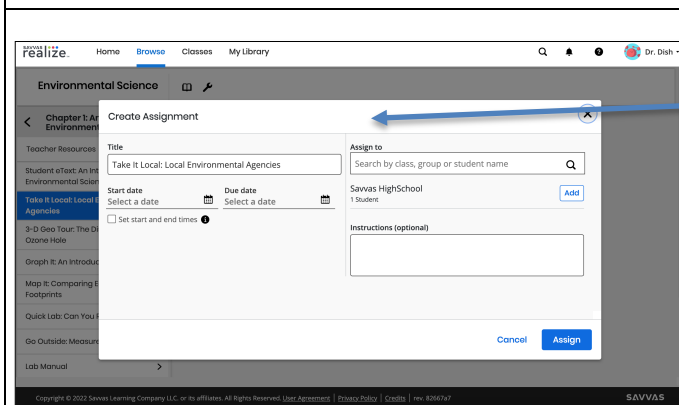

All the digital activities for each lesson can be found in the chapter. You'll see several text links to the Student Edition. In addition, interactive options are listed here as well.

Click the **Take it Local** Activity for the chapter.

Click **Take It Local** in the middle of the screen to view the activity.

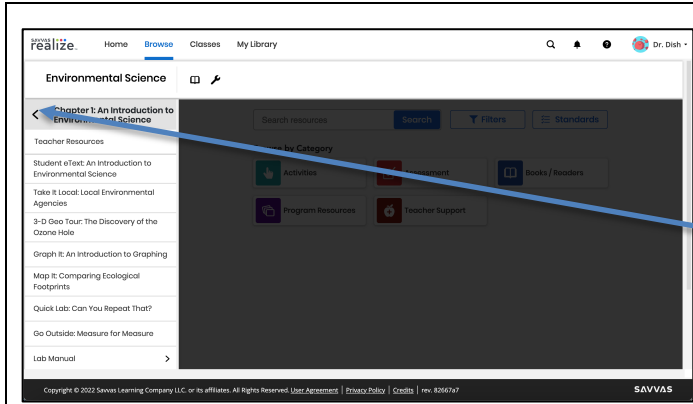

To assign the activity to a student, class, or group of students, click assign.

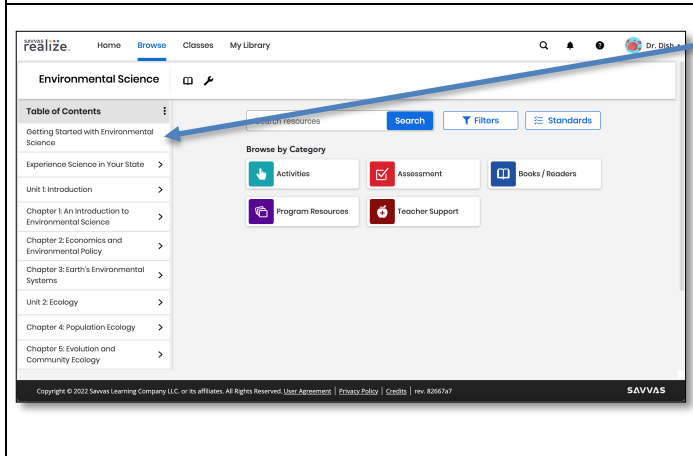

This window helps you customize the assignment by adding a due date, instructions and specifying the students who will complete the activity.

Do not assign an activity at this time. Close this box for now by clicking on cancel.

Reflect: How will you use the assignment customization options to differentiate instruction?

Using the black arrows, return to the **Program Table of Contents**.

To learn more about teaching with *Environmental Science*, click the **Getting Started** tab at the top.

Here, you'll find helpful videos, documents, planning resources, and links to additional resources.
