

Creating Custom Courses by Settings

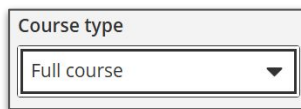

Custom courses can help narrow the focus for students. Educators can create custom courses based on settings of a full course or an existing custom course. The common use of creating a Custom Course by Settings is to assign a course to a student without IP. Custom Courses by Settings are usually created in instances of needing IP turned off. Work with your Education Consultant to determine if this type of custom course works best for you. It's important to note that any Custom Course you create will be shared and visible across the entire school, so please exercise caution when creating.

1 Copy a course.

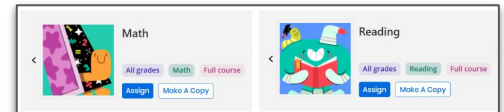

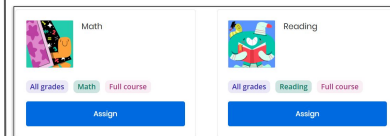

- A** Go to the *Courseware Tab* then click *Courses*.

- B** Find a course in the list you want to copy, or select *Full Courses* in the Course type dropdown menu.

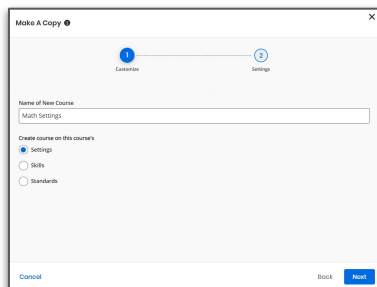

- C** Click on the course, and then click *Make a Copy*.

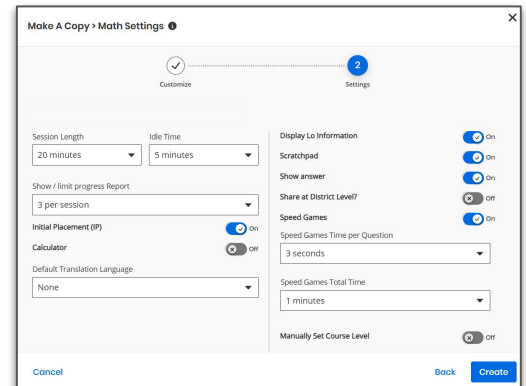

2 Edit the course.

- A** Create a new name for the course, select the button by *Settings*, then click *Next*.

- B** Adjust any settings then click *Create*.

The skills or standards that are already included in the original course will copy over to the new course.

3 Assign the course.

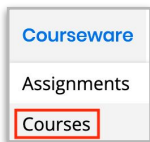

After creating the custom course, ensure that you assign to the appropriate students. Use the same steps in the **Assigning Successmaker Courses** document to assign your newly created custom course!

Creating Custom Courses by Skill

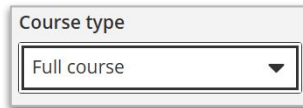

Custom courses can help narrow the focus for students. Educators can create custom courses to include specific skills, allowing students additional time and practice in areas needing growth. It's important to note that any Custom Course you create will be shared and visible across the entire school, so please exercise caution when creating.

1 Copy a course.

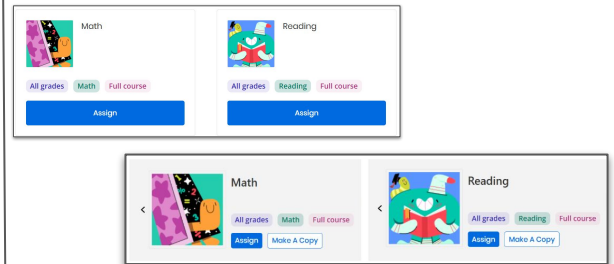

- A** Go to the *Courseware Tab* then click *Courses*.

- B** Find a course in the list you want to copy, or select *Default Courses* in the dropdown menu.

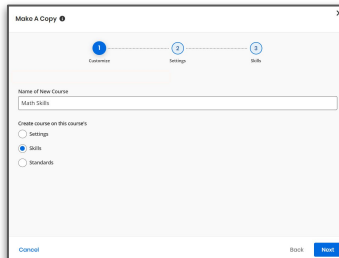

- C** Click on the course, and then click *Make a Copy*.

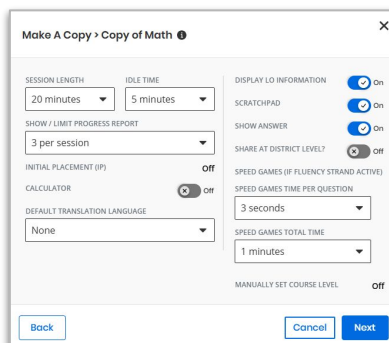

2 Edit the course details.

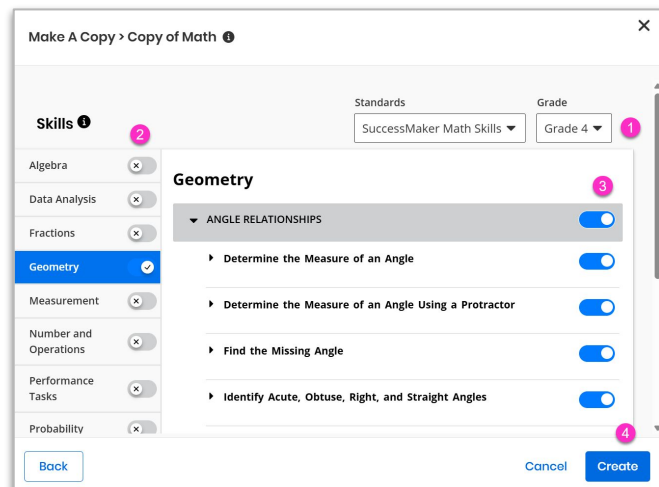

- A** Create a new name for the course, select the button by *Skills*, then click *Next*.

- B** Adjust any settings then click *Next*.

- C** Select the content.
1. Select the Grade Level.
 2. Toggle on/off specific strands.
 3. Turn on/off concepts & specific skills.
 4. Click *Create*.

3 Assign the course.

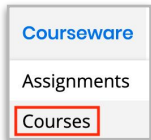

After creating the custom course, ensure that you assign to the appropriate students. Use the same steps in the **Assigning SuccessMaker Courses** document to assign your newly created custom course!

Creating Custom Courses by Standard

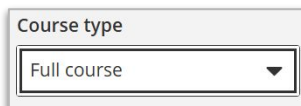

Custom courses can help narrow the focus for students. SuccessMaker aligns to state standards, and teachers can create courses focused on standards to meet student needs. For educators using another Savvas curriculum, courses can be created to coincide with corresponding units or topics. It's important to note that any Custom Course you create will be shared and visible across the entire school, so please exercise caution when creating.

1 Copy a course.

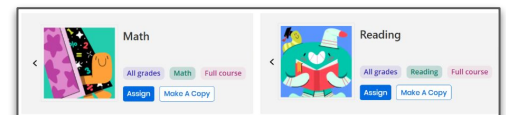

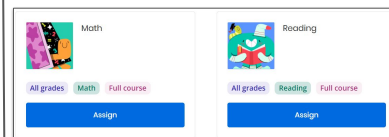

- A** Go to the *Courseware Tab* then click *Courses*.

- B** Find a course in the list you want to copy, or select *Default Courses* in the dropdown menu.

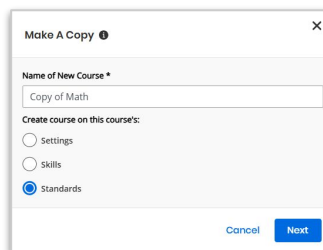

- C** Click on the course, and then click *Make a Copy*.

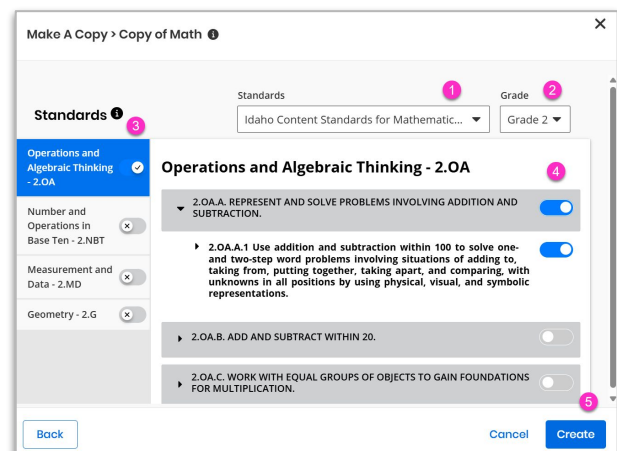

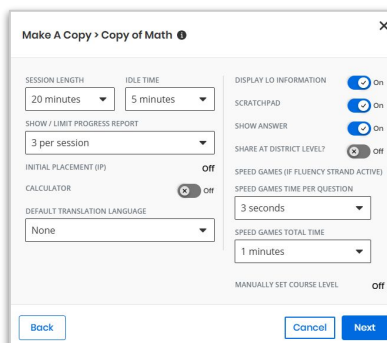

2 Edit the course details.

- A** Create a new name for the course, select the button by *Standards*, then click *Next*.

- C** Select the content.
1. Select the State Standards or Savvas curriculum.
 2. Select the Grade Level.
 3. Toggle on/off specific strands.
 4. Turn on/off concepts & specific skills.
 5. Click *Create*.

- B** Adjust any settings then click *Next*.

3 Assign the course.

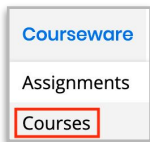

After creating the custom course, ensure that you assign to the appropriate students. Use the same steps in the **Assigning SuccessMaker Courses** document to assign your newly created custom course!

Creating Custom Courses by Savvas Program

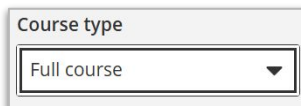

Custom courses can help narrow the focus for students. For educators using another Savvas curriculum, courses can be created to coincide with corresponding units or topics. It's important to note that any Custom Course you create will be shared and visible across the entire school, so please exercise caution when creating.

1 Copy a course.

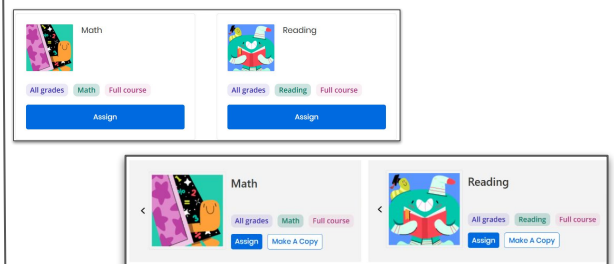

- A** Go to the *Courseware Tab* then click *Courses*.

- B** Find a course in the list you want to copy, or select *Default Courses* in the dropdown menu.

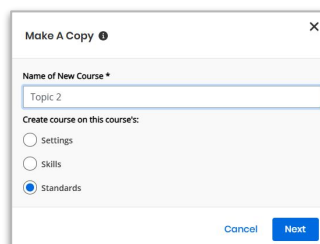

- C** Click on the course, and then click *Make a Copy*.

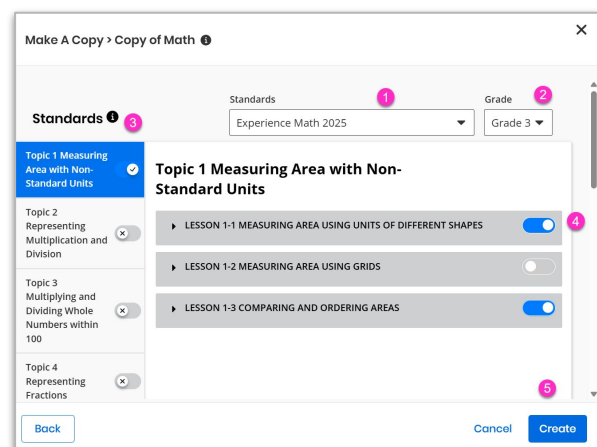

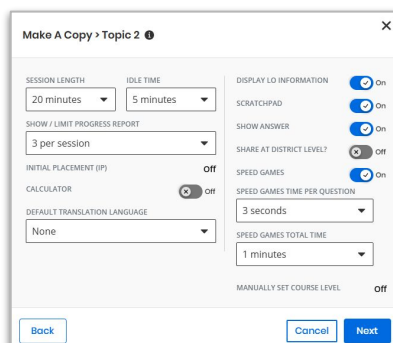

2 Edit the course details.

- A** Create a new name for the course, select the button by *Standards*, then click *Next*.

- C** Select the content.
1. Select the Savvas curriculum.
 2. Select the Grade Level.
 3. Toggle on/off specific strands.
 4. Turn on/off concepts & specific skills.
 5. Click *Create*.

- B** Adjust any settings then click *Next*.

3 Assign the course.

After creating the custom course, ensure that you assign to the appropriate students. Use the same steps in the **Assigning SuccessMaker Courses** document to assign your newly created custom course!

Creating Custom Courses for State/District Assessments

SuccessMaker custom courses complement the Reading and Math default courses within *SuccessMaker* for added differentiation. **Courses can be created based on specific standards covered on high-stakes assessments.**

It's important to note that any Custom Course you create will be shared and visible across the entire school, so please exercise caution when creating.

Creating Custom Courses for High-Stakes Assessment Preparation:

- Partner with your Savvas representative to **provide** a list of standards/benchmarks covered on each state test or assessment
- If there are multiple state/district tests in a year, the standards/benchmarks can be **broken out** per test, quarter, trimester, semester to create separate courses
- Determine and share which **grade levels** are tested
- Your Savvas representative will **create** the custom course for your district
- Your District *SuccessMaker* Admin will **share** the course with select schools, see below for next steps

Sharing Custom Courses for High-Stakes Assessment:

Once your Savvas representative has created the course and selected *Share at District Level*, your *SuccessMaker* Admin for the district will need to share it to all/select schools through their *SuccessMaker* Admin Dashboard. The *SuccessMaker Admin* can follow the steps below.

1. **Log in** to the SuccessMaker Admin Dashboard
2. Click on the **Shared Courses** tab
3. Find the course to be shared, click **Edit**
4. Select **Share All** to share to all schools, or select specific schools
5. Click **Save**
