What is Adaptive Practice powered by Knewton?
Adaptive Practice is an online digital component available for every grades 3-5 enVision Mathematics ©2020 lesson on SavvasRealize.com.

Each Adaptive Practice assignment is personalized to fit the individual student’s learning needs as he/she works through the assignment. The assignment includes on-level work as well as instruction and practice of prerequisite skills, if needed. By assigning Adaptive Practice to your entire class, students will receive differentiated and personalized assignments aligned to the skill you are currently teaching.

What are the benefits of Adaptive Practice in enVision Mathematics ©2020 Grades 3-5?
No two assignments are alike, because no two students have the exact same needs. Students get the personalized attention they need, even when you’re not there.

How can I find Adaptive Practice in my enVision Mathematics ©2020 course on Realize?
It’s easy! In Grades 3-5, within your daily lesson on Savvas Realize, navigate to Practice & Problem Solving in the Table of Contents and look for the label “Adaptive Practice Powered by Knewton”; This feature can be found in every daily lesson.
How does Adaptive Practice work?

1. **Assign It**
   Teachers need to assign Adaptive Practice via Savvas Realize for students in grades 3-5 to access the practice problems through their enVision Mathematics ©2020 Realize account.

2. **Provides Practice and Instruction for Students Struggling with Concepts**
   When students’ responses indicate they would benefit from additional instruction, they will be assigned a task that will provide support and reinforce the concept. When students are struggling, they will receive tasks in the assignment screen that include resources like:
   - Lesson Examples
   - Visual Learning Animations Plus
   - Do you understand? / Do you know how?
   - Reteaching to Build Understanding
   - Another Look Homework Videos

3. **Improves with More Interaction in Realize**
   The Adaptive Practice problems that are served up are based on students’ performance on course assessments in Savvas Realize and on the Adaptive Practice. As students complete more questions and assignments, they fuel Knewton’s understanding of their knowledge level for further assignments.

**Can I view my students’ adaptive assignments and see what tasks they were assigned?**
You can view each student’s personalized assignment after it has been completed and submitted.
