

Manual Rostering: Connecting Savvas Realize to Google Classroom

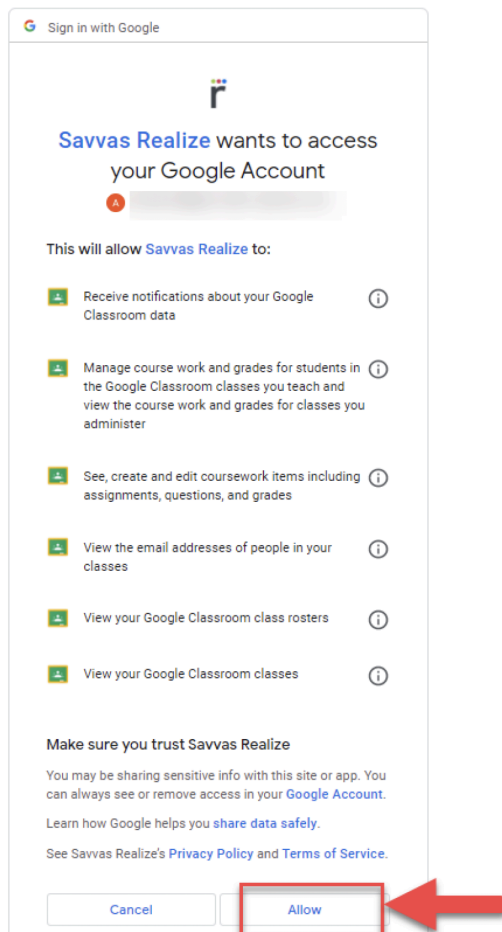

For easy classroom use you have the option to connect your Google Classroom to Savvas Realize. This means anything you assign from MathUP Student or Sankofa K-3 will go directly to your Google Classroom. Students will log into Google Classroom vs. Savvas Realize.

1. In Savvas Realize, select the **Classes** menu and click the “Import a Google Classroom from Google Classroom” button:

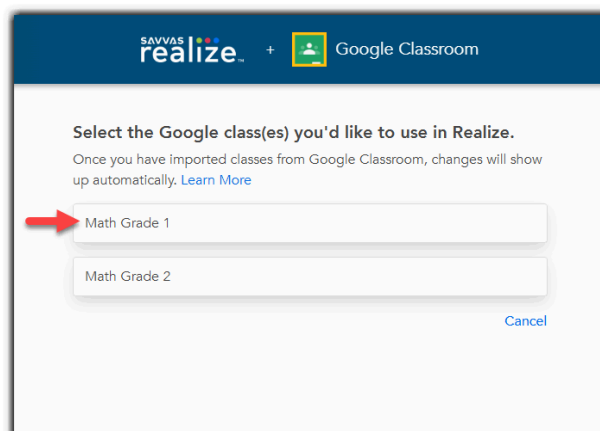

2. You will go through a series of screens shown below. Choose your school/district Google account, and Log in.

3. Now **SavvasRealize** has been granted access to your Google Classroom, so you will go through the following screens to **complete the connection** with your Google Classroom class.

- **Select the Google Class(es) you'd like to use in SavvasRealize:**

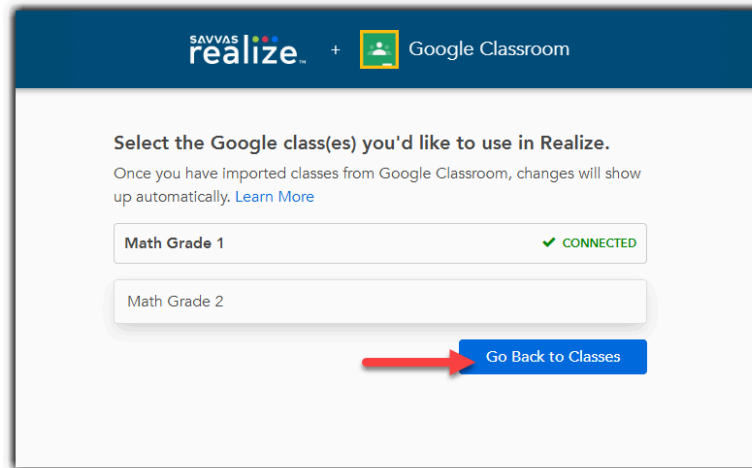

- **Select programs for the classroom** by clicking the drop-down menu, and selecting the program you wish to use:

The screenshot shows the 'realize.' logo and 'Google Classroom' header. Below, it says 'Select the Google class(es) you'd like to use in Realize.' and 'Once you have imported classes from Google Classroom, changes will show up automatically. [Learn More](#)'. A list of classes is shown: 'Math Grade 1' with a green checkmark and 'SELECTED' label, and 'Math Grade 2'. Below the 'Math Grade 1' class, there is a section 'Add Realize Programs to this Class' with a drop-down menu. A red arrow points to the drop-down menu, which currently shows 'MathUP Student Grade 1 Ontario'. To the right of the drop-down is an 'Import Class' button. At the bottom right is a 'Cancel' link.

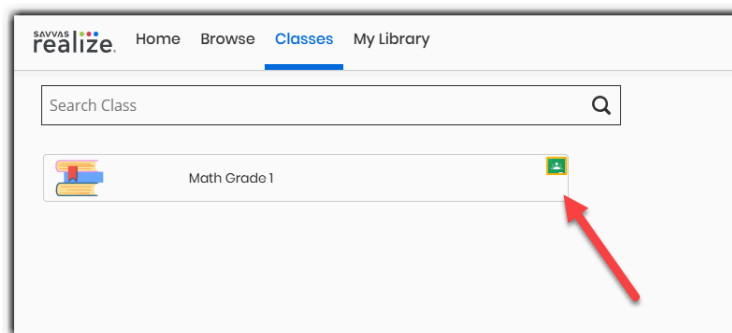

- **Import your Class** by selecting the Import Class button:

This screenshot is identical to the one above, showing the 'realize.' logo, 'Google Classroom' header, and the class selection interface. The 'Math Grade 1' class is selected. The 'Add Realize Programs to this Class' section shows the drop-down menu with 'MathUP Student Grade 1 Ontario' selected. A red arrow points directly to the 'Import Class' button, which is located to the right of the drop-down menu. The 'Cancel' link is at the bottom right.

- **Go Back to Classes in Realize:**

The imported **Google Classroom** is now in **Realize**. Imported classes display the Google Classroom class name and a Google Classroom icon.

Now **everything** you assign in **MathUP Student** or **Sankofa K-3** will **automatically** be assigned in your **Google Classroom**.
