

Add Products to Classes

Introduction

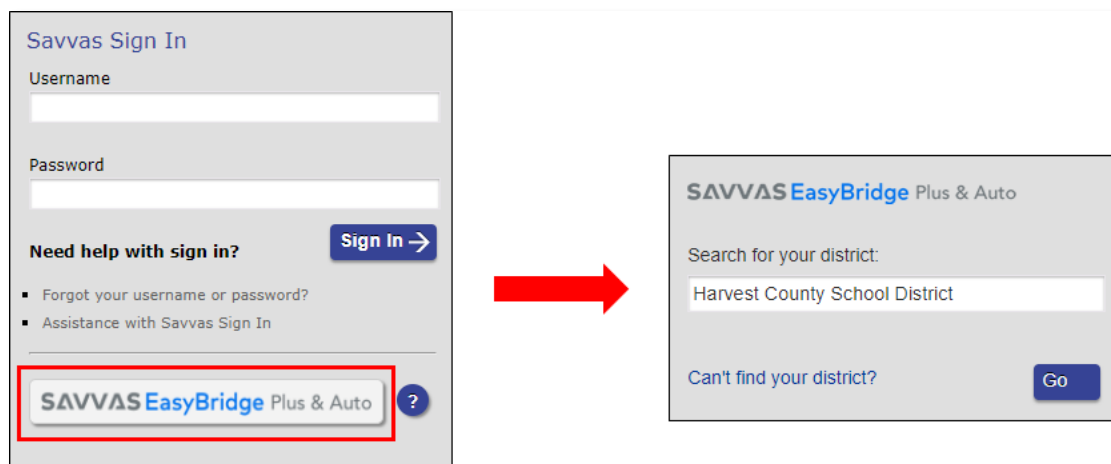

In this handout you will learn how to add products to classes on EasyBridge.

Access Savvas EasyBridge

To add products to classes, you will first need to login to your district's custom web page. Contact an administrator in your district if you are unsure where to go to access your custom sign-in page. When you sign in, you land on Savvas EasyBridge. Another option is to sign in at SavvasEasyBridge.com. Follow the steps below to sign in at SavvasEasyBridge.com:

1. Click the Sign in down-arrow and select **Teacher or Student sign in**.
2. Click the **Savvas EasyBridge Plus & Auto** logo. Begin typing the name of your district. Select it in the field below when it appears.

3. Click **Go**.
4. Now enter your username and password and click **Sign In**.

When to Add Products

You can add your Savvas products to each class through EasyBridge. You will need to complete this step at the beginning of each school year.

If you teach quarter or semester courses, you will need to add products to classes at the beginning of each new term. As the new term approaches, you will see your classes appear on the **Future classes** tab.

Best Practice: Adding products to classes gives students access to the class on the learning platform. It is a best practice to add products to future classes when you are ready for students to see the class on the learning platforms.
