Activities

Nature's Land Scrapers

Name: _____ Date: _____

Much of the landscape of the northern United States, including the Great Lakes, was shaped by glaciers scraping the ground. You'll learn all about the action of glaciers in this Planet Diary activity.

Directions

- Go to [Glaciers](#). Read the *Introduction* on the right, then click *Overview*. Click the right arrow at the upper right to advance to *4 Glacial Erosion*. Read the summary on the right.
- Click the right arrow again to advance to *5 Glacial Erosion Features*. Select the feature from the menu below the picture and read the descriptions on the right. Use the information to complete the *Workspace* table.
- Click *Model* to experiment with making the glacier grow or shrink by changing the temperature and precipitation controls.
