

Unit Organization

The ReadyGEN Biliteracy Pathway is organized around units and modules. There are six units in Grades K–2 and four units in Grades 3–6. The unit themes emphasize the common characteristics of a unifying concept and promote in-depth understanding. Each unit is comprised of a Pathway Module (Module P) and a paired English module (Module A or B). The content of both modules is connected by the unit theme so students build content knowledge in both languages. Each Pathway module includes eight or nine Spanish literacy lessons, plus four Cross-Language Connections Lessons. Grades 3–6 also have additional Literacy Project lessons during Module P. The total number of lessons for Module P will be roughly the same as the number of lessons in the paired English module.
