

Accessing the Family Engagement Resources

Steps to Success:

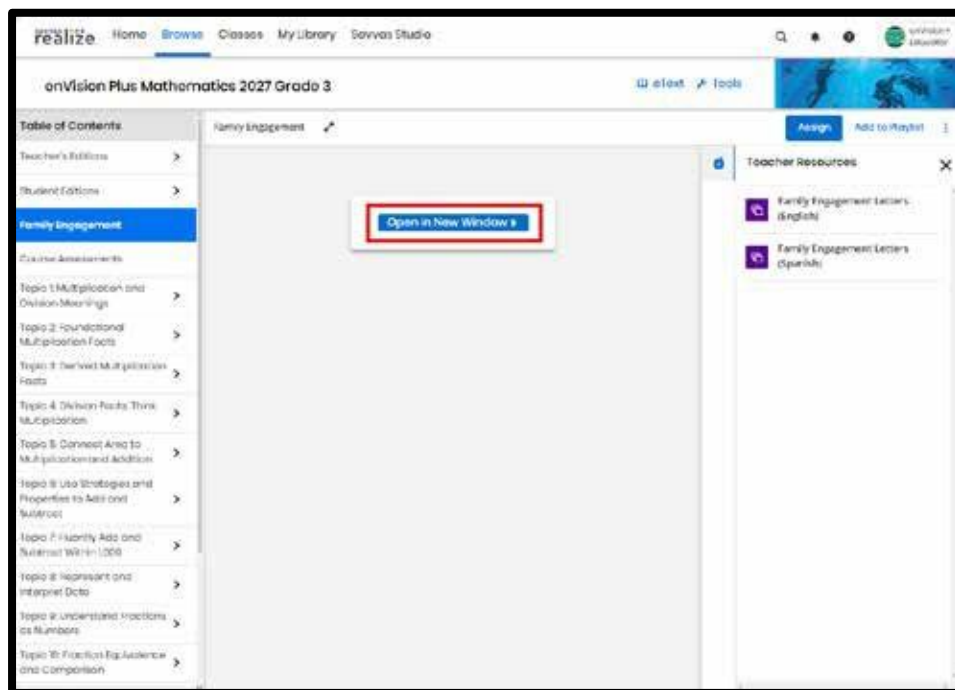

1. Locate “Family Engagement” within your program's dashboard. It is found either in the menu on the left of the dashboard or by clicking on the picture above “Family Engagement Support”.

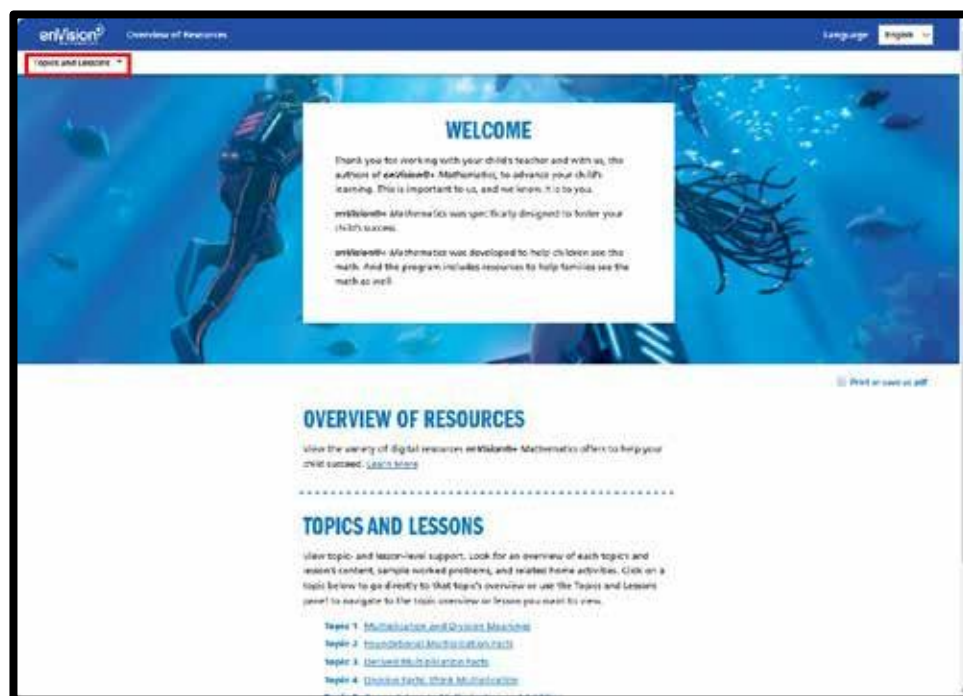

2. On the far right, under “Teacher Resources”, a Family Engagement letter is available in either English or Spanish. This letter is a great way for teachers to introduce the **enVision⁺** resources to your students’ families.

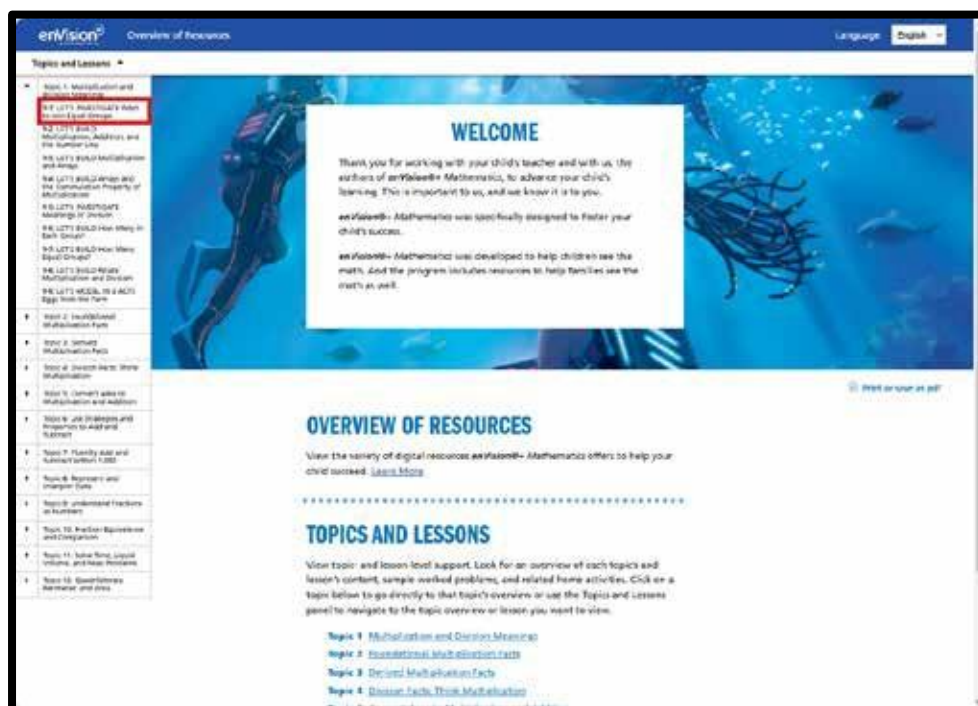

3. To access the Family Engagement resources, click **Open in New Window**.

4. A list of topics is given so students and families are able to go directly to the topic number that is needed. Click **Topics and Lessons**.

5. In this example, Topic 1, Lesson 1 is chosen.

6. **Math Help At Home** provides students and families a brief lesson about the chosen topic, additional practice opportunities, and activities you can do at home.

Sample Additional Practice Exercise 1

Find the total number of dots. Explain or show how you found the answer.

18 dots

I added $6 + 6 + 6 = 18$

Because each group has the same number of dots, you can find the total by repeated addition: $6 + 6 + 6 = 18$.

HOME ACTIVITY close window

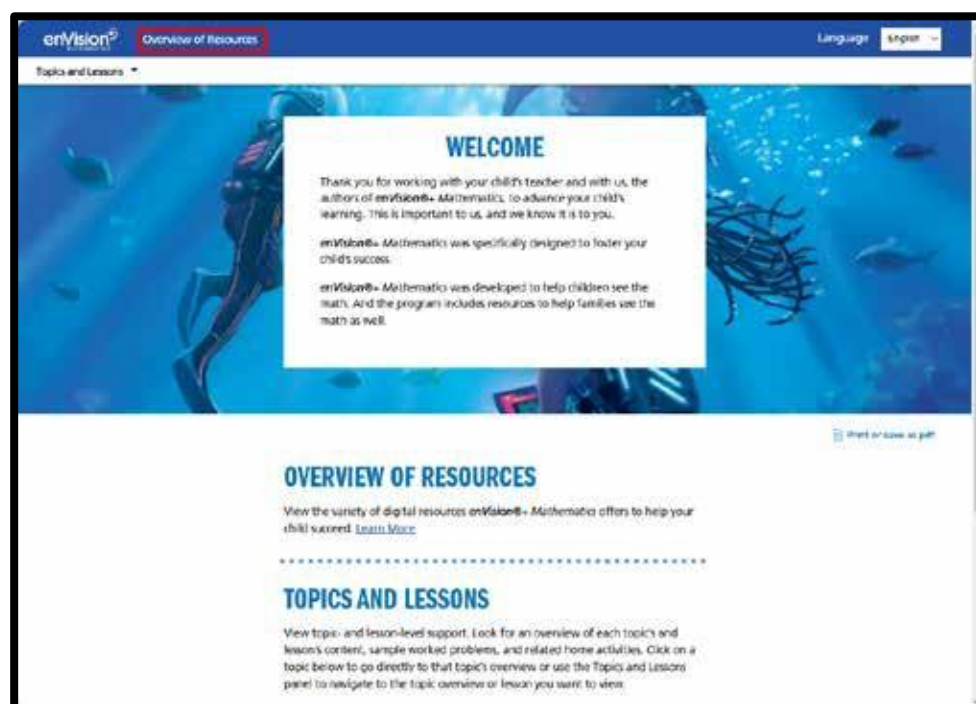

Jump and Count

MATERIALS
Measuring Tape or Ruler, Self-Adhesive Notes

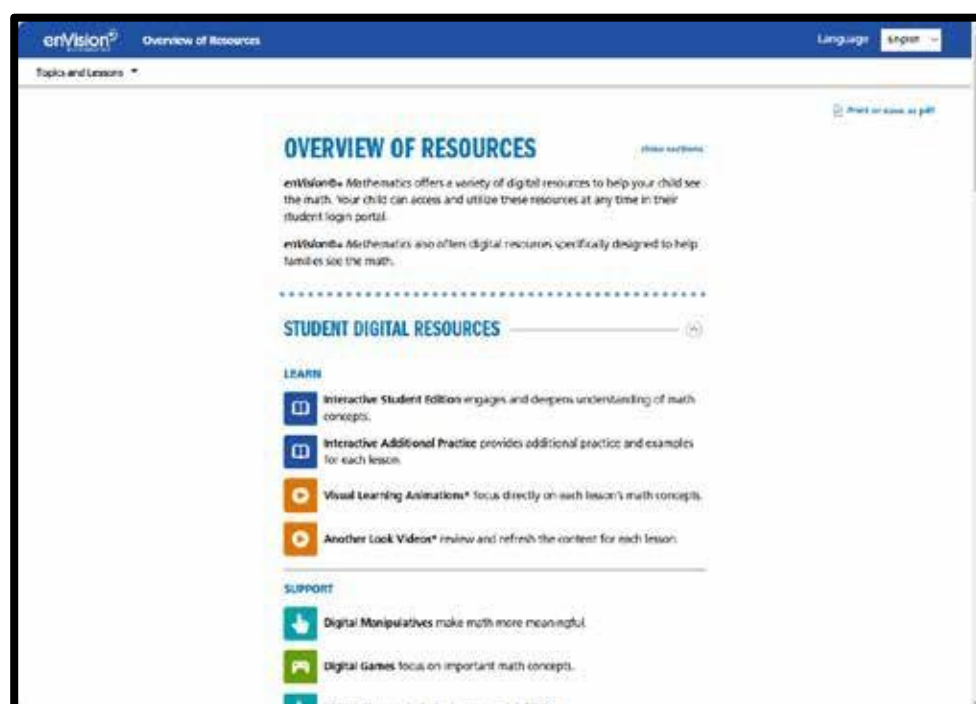

ACTIVITY
Place 6 self-adhesive notes on the floor in a line, 2 feet apart. The first note represents 0 on a number line, and the other notes represent 2, 4, 6, 8, and 10. Have your child stand next to the first note, then jump to 2 with their left foot, 4 with their right foot, 6 with their left foot, 8 with their right foot, and 10 with their left foot. Repeat and count aloud while jumping: 2, 4, 6, 8, 10. You and your child can both jump all around the room, about 2 feet per jump, while counting aloud to 100.

Next, place notes 3 feet apart and have your child jump and count: 3, 6, 9, 12, 15. You and your child can now jump and count aloud by 3s to 30, or as far as your child knows the multiples of 3.

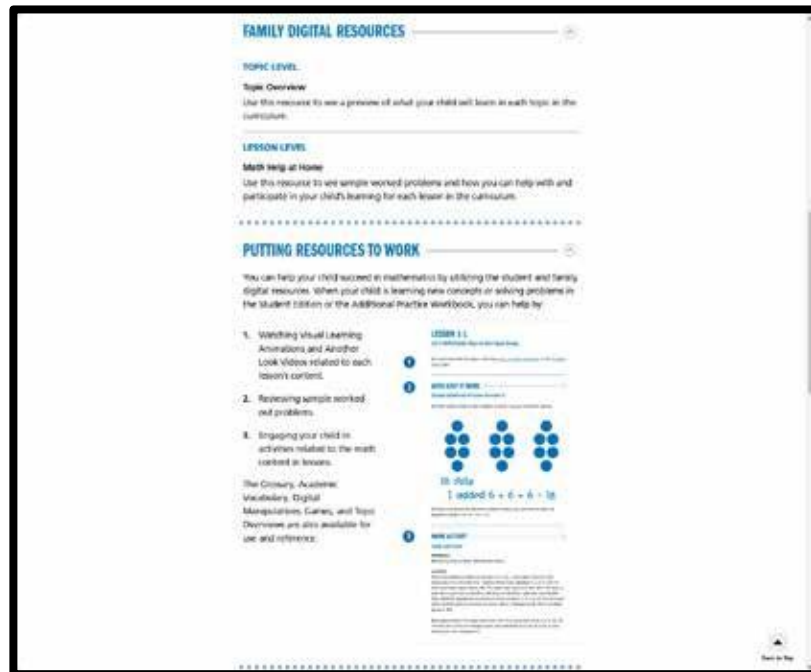

7. Back on the main Family Engagement page, click **Overview of Resources**.

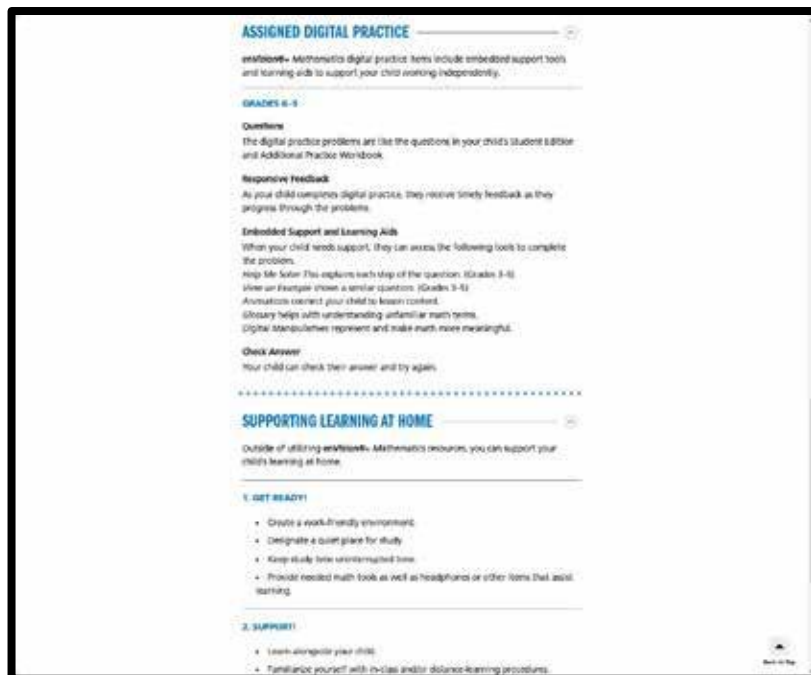

8. When the “Overview of Resources” tab is chosen, you’ll see a listing of the student digital resources, a list of homework resources that **enVision+** offers, and various ways families can support learning while at home.

9. Further down the page, you'll see **Family Digital Resources**, including the **Topic Overview and Math Help at Home** resources.

10. Finally, at the bottom of the page you'll see extra support tools and learning aids to support learning at home.

Thank you for viewing these Steps to Success! We hope you found this helpful. Be sure to check out [MySavvasTraining](#) for more tutorials and tips.
