

OWL Online Resources

Introduction This guide explores the Opening the World of Learning (OWL) online resources available through Savvas SuccessNet®. It examines how to access interactive lesson content as well as various teaching and planning resources. This guide also explores online assessment and progress-monitoring tools.

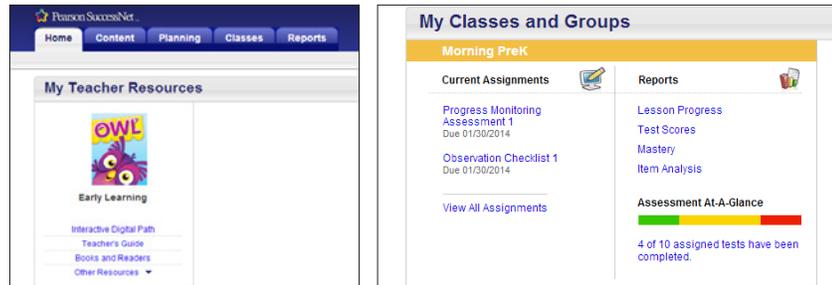

Accessing Your Account To begin, go to SavvasSuccessNet.com.

If you have already completed the registration process, click **Log in** under Returning User, and sign in with your username and password.

Teacher Center Home Page

Once you log in, you will arrive at your Teacher Center Home page.

Use the tabs at the top of the page to access course content, planning resources, class management tools, and reports to help you monitor students' progress.

The links under My Teacher Resources provide quick access to teaching and planning resources and interactive lesson content.

Under My Classes and Groups, find a list of class assignments, access to various reports, and a quick snapshot of assessment results for each class.

Next, take a closer look at My Teacher Resources and some of the testing and reporting features that you will use to track student progress.

My Teacher Resources

Take a look at the resources available under My Teacher Resources. Here, you will find links to the Interactive Digital Path, Teacher's Guides, Books and Readers, and other valuable resources.

Interactive Digital Path

Clicking the Interactive Digital Path link brings you to the Table of Contents page. You can view and assign interactive lesson content here.

Select the unit and week that you are currently teaching to see a list of available resources. You can integrate these resources into whole-class instruction or assign them for one-on-one instruction or individual practice.

For example, you may want to share Envision It! Animations, which feature Ollie and his friends introducing the theme’s Big Question, during whole-class instruction.

Learning Games, which provide important skill-building practice, might be more appropriate for independent practice.

Look for the OWL Interactive icons, found throughout your Teacher’s Guides, for reminders about the interactive resources that are available to support and enhance each lesson.

For instance, when planning a Day 5 Story Time lesson that focuses on rereading and retelling the weekly Trade Book story, you will notice that there is an interactive Story Sort available online.

The screenshot displays a digital lesson plan for 'Story Time' on 'Day 5'. The sidebar on the left lists various activities under 'Quick & Easy' and 'Interactive' categories. The main content area features a 'Reread and Retell' section with three numbered steps: 1. Reread, 2. Retell and Elaborate, and 3. Go Beyond. Each step includes specific instructions and questions for students. A 'Feedback' section at the bottom of the main content area provides additional guidance. The page number '134' is visible in the bottom left corner, and a 'Differentiated Instruction' note is in the bottom right corner.

From your Savvas SuccessNet® account, you can preview the Story Sort and assign it for students to complete as an independent practice activity.

Teacher's Guide

Click the Teacher's Guide link to access eText versions of the unit Teacher's Guides, Planning and Assessment Teacher's Guide, and Professional Development Handbook.

It is easy to navigate to specific pages or lessons within each Teacher's Guide.

For example, From the Plan Your Week page, you can quickly jump to the Day 1 Literacy Circle lesson. And you can access interactive lesson content at point of use.

Within the eText Teacher's Guide you also have access to customizable lesson planners. To access these planners, navigate to the eText Table of Contents, click **Teacher Resources**, and select the Lesson Planners folder.

After you choose your desired unit and week of instruction, a document will appear at the bottom of the screen. This document provides detailed lesson plans for each day of instruction. You can customize each plan, as needed, to suit your students' needs. Just be sure to save the updated version to your computer.

Books and Readers

Click **Books and Readers** to access the Interactive Big Books. Select the unit and book that you are looking for, and you are ready to begin reading.

You can project the text onto a whiteboard for whole-class instruction. You may also choose to use the interactive reader for one-on-one instruction or independent practice.

Phrase-by-phrase highlighting allows students to track the print as they hear the text read aloud.

Other Resources

Under Other Resources, you will find additional teaching and planning resources, such as graphic organizers, Hands-On Activity Aids, resources to promote connections with students' families, and Assessment Reproducibles.

Assessment

Take a closer look at the assessment and progress-monitoring resources available through Savvas SuccessNet®.

Within your online account, you have access to the OWL Screening Assessment, Progress Monitoring Assessments, Observation Checklists, and the End-of-Year Assessment.

Walk through the process of assigning a test and inputting test data in your Savvas SuccessNet® account.

Assign the Test

You will first want to assign the test to your students.

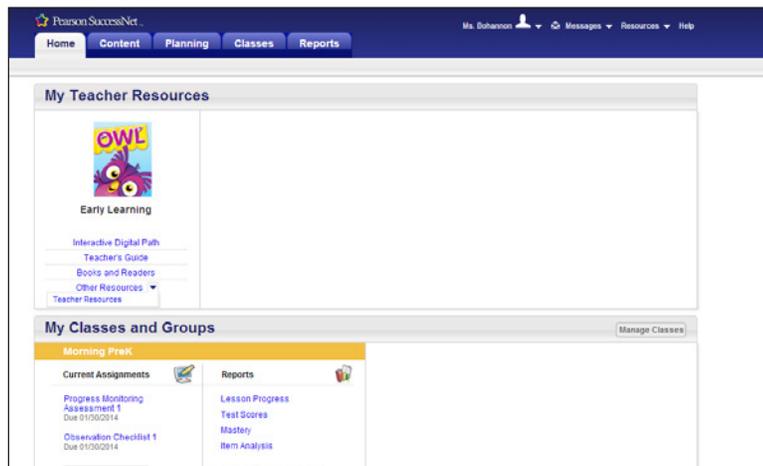

Go to the Content tab, and select **Tests**. Select the test that you are looking for under Test type. For example, select **Screening Assessment**.

When you place your cursor over the test name and click, a blue menu appears. From here, you can assign the test to all or some of the students in your class. If you do not wish to assign the test to a certain student, simply uncheck the box next to his or her name. Select the range of dates that you would like the test to be available, and click **Save**.

The test now appears in the assignment list on the Planning tab.

Administer the Test

After you have assigned the test to students through your Savvas SuccessNet® account, the next step is to administer the test. You can access copies of the assessment and recording form under My Teacher Resources.

Or, you can copy them directly from the Planning and Assessment Teacher's Guide.

Input Test Data

After administering the test, you will need to input the results into your Savvas SuccessNet® account. Navigate to the test by going to the Planning tab and selecting **Assignments**.

Place your cursor over the test name, click, and select **Edit/Score**. Find the student's name, and select **Score/Re-score** under Test Responses.

A list of test items appears. Click **Show Questions** to see how this list corresponds to the information on the recording form. Refer to the information that you collected on the recording form as you assign a score of either 1 or 0 for each question. When you are finished, click **Save**. The results now appear in the Percent Score column. They are also factored into the Assessment-At-A-Glance image on the Home page.

Track Progress Your Savvas SuccessNet® account provides a number of reports to help you track students' performance and progress. To access these reports, hover over the Reports tab at the top of your Home page. You can also use the links in the My Classes and Groups section.

Test Scores Report

Look at an example of a Test Scores report. This page shows an overview of your students' test scores.

The Average % Student Scores column shows each student's average percent score for all assessments taken to date. Notice that the colors in this column correspond to those listed in the Proficiency Legend.

To view the Student Progress Report for a specific student, click the student name, and the Student Progress Report appears. You can save the report, as either a spreadsheet or PDF, for future reference.

Use the information in this report to help identify areas of strength and weakness for each student and to get a sense of a student's progress over the course of the year.

Mastery Report

If you are wondering what the class's performance looks like for a specific skill or standard, look to the Class Mastery Report.

The skills and standards are listed across the top row. Hover over any item in this row for information about the skill that it represents.

You can also look to the Mastery for this class section for a quick overview of the percentage and count of students who have mastered each skill.

Consider the information in these reports as you plan future instruction.

Review

This guide explored the OWL online resources available through Savvas SuccessNet®. It examined how to access interactive lesson content as well as various teaching and planning resources. This guide also explored online assessment and progress-monitoring tools.
