

Updated Administrator Experience

What's
NEW
for BTS26!

Savvas is excited to introduce new enhancements to our *SuccessMaker*® Administrator Experience based on feedback we've tested with school and district leaders.

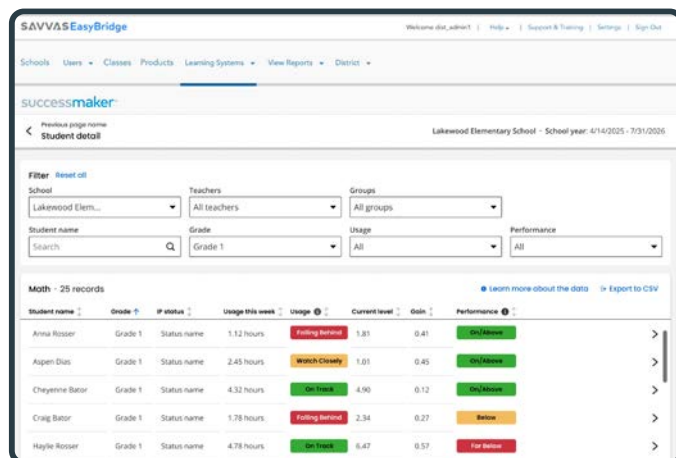

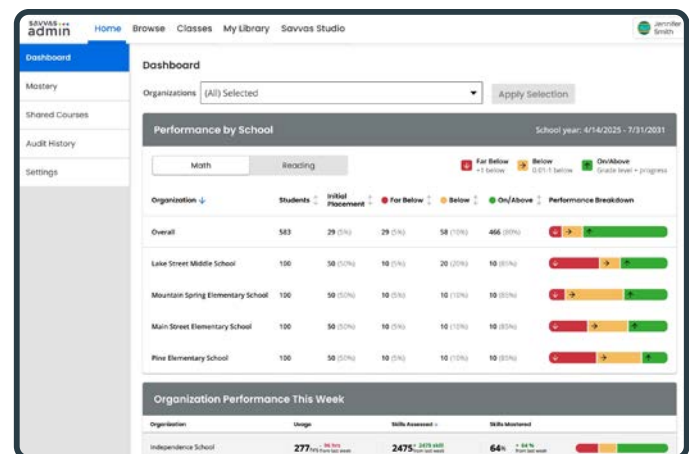

We've made several enhancements that provide *SuccessMaker* district and school administrators with easier, more intuitive access to school-level and student-level data.

NEW! Easier Access to School Performance Data

The new **Performance by School** widget on the *SuccessMaker* Administrator Dashboard gives administrators quick access to a snapshot of *SuccessMaker* performance data by school.

Administrators can see:

- Total *SuccessMaker* student enrollment at each school.
- Which students are currently in Initial Placement.
- An easy-to-read performance breakdown of student progress in *SuccessMaker*.

NEW! Immediate Access to Student-Level Data

The new **Performance by School** widget on the *SuccessMaker* Administrator Dashboard allows administrators to see individual student usage and performance data for all students in a particular school.

Administrators can:

- Quickly sort and filter to view student insights that matter most.
- Navigate between multiple schools' performance and usage data in one continuous view.
- Export student data for deeper analysis anytime.
