Social studies is more than dots on a map or dates on a timeline. It’s where we’ve been and where we’re going. It’s stories from the past and our stories today. And in today’s fast-paced, interconnected world, it’s essential.

Welcome to the next generation of social studies!

*United States History* was created in collaboration with educators, social studies experts, and students. The program is based on the Savvas Mastery System. The System uses tested best practices, content expectations, technology, and a four-part framework—Connect, Investigate, Synthesize, and Demonstrate—to prepare students to be college- and career-ready.
The System includes:

- Higher-level content that gives support to access complex text, acquire core content knowledge, and tackle rigorous questions.
- Inquiry-focused Projects, Civic Discussions, and Document Analysis activities that develop content and skills mastery in preparation for real-world challenges.

- Digital content on the Savvas Realize™ platform that is dynamic, flexible, and uses the power of technology to bring social studies to life.
- The program uses essential questions and stories to increase long-term understanding and retention of learning.
Connect with real-world stories!
Developed in partnership with NBC Learn, My Story videos help students understand Social Studies through a unique perspective. Students will soon make the connection that they themselves are the vital link between long-past eras and the world today.

Make a Connection
Get students ready to learn by helping them make a personal connection to new content while activating prior knowledge.

Connect through inquiry-based learning.
Easy-to-Use Projects offer rubrics for students and resources for teachers.
Civic Discussions encourage students to base arguments on evidence.
Document-Based Questions provide complete writing activities all in one place.
Connect to today’s students with a new Student Text.

- A fresh, new, slimmer student book provides rigorous content.
- A magazine-like design with primary source call-outs and dramatic photos that support the text.
- Higher-order thinking questions and higher Depth of Knowledge assessments than traditional textbooks.
Engage every learner with a personalized pathway!

- Chunked text allows students to learn at their own pace, in their own way, on any device
- Dynamic images for visual learners
- Audio support for struggling readers
- One-click access to vocabulary definitions in English and Spanish

Investigate Spark Investigation

The attack on Pearl Harbor brought America into World War II on the Allied side. By June 1942, the Allies were battered but still fighting. British pilots had fought off a Nazi invasion of their island, while at the Battle of Coral Sea, the U.S. Navy had frustrated Japanese plans to extend their domination in the Pacific. Though years of fighting lay ahead, the Allies spied signs of hope.

A War on Two Fronts

Allied Strategy
The Axis Powers never had a coordinated strategy to defeat the Allies. Germany, Italy, and Japan shared common enemies but had strategies that reflected their individual political and military goals. Hitler wanted to dominate Europe and eliminate “inferior” peoples. Mussolini had dreams of an Italian empire stretching from the eastern Adriatic to East Africa. Tojo sought Japanese control of the Western Pacific and Asia. The Allies shared a unified goal, although they did not completely trust one another. Roosevelt and Churchill feared that Stalin wanted to dominate Europe.

Stalin believed that the West wanted to destroy communism. None of the Allies wanted to risk a breakdown in their alliance, however. Roosevelt worked closely with Churchill to manage the relationship with their powerful but problematic ally, Stalin.

Roosevelt, Churchill, and Stalin considered Germany the most dangerous enemy. None felt Japan or Italy posed a serious long-term threat. Only Germany had the resources to simultaneously bomb Britain, fight U.S. and British navies on the Atlantic, and invade the Soviet Union across a 1,200-mile front. Thus, although their ultimate goal was to fight and win a two-front war, Roosevelt and the other Allied leaders agreed to pursue a “Europe First” strategy. They would

Context for content
Each lesson begins with a narrative preview that provides context for what students will learn in the coming lesson.

Mileposts for understanding questions act as reading speed-bumps, ensuring students understand what they’ve read before continuing on—available as open-ended questions in the Student Text or as multiple choice in online Text for instant feedback.

See, analyze, and interact
Students can use primary source image galleries throughout the lesson to interact with images that tie to the topic’s story content.

The European Front
The first blow American public opinion took against the Axis was by fulfilling Roosevelt's promise to be the "arsenal of democracy." American factories turned out millions of tons of guns, tanks, and other supplies—enough to keep the Soviet and British battling Germany for years. The problem was delivering the weapons, food, and medical supplies that fueled the Allied war machine.

War in the Atlantic
Hitler was determined to cut the supply lines between the United States and Europe before American aid could make a difference. German U-boats pounced on the Atlantic and Caribbean, sinking more than 1,500 merchant ships and killing tens of thousands of Allied seamen. "The only thing that ever really frightened me during the war was the U-boat peril," Churchill wrote.

Finally, in mid-1943, the Allies began to win the war in the North Atlantic. As in World War I, convoys of escort carriers protected Allied shipping.

A new invention, radio, helped Allied vessels locate U-boats on the surface at night. Bombers and underwater depth charges allowed Allied forces to sink U-boats faster than Germany could manufacture them.

Soviets and Nazis Battle for Stalingrad
Germany had attacked the Soviet Union in June 1941, sending one army north toward Leningrad, a second east toward Moscow, and a third south toward Stalingrad. Although Hitler’s forces pushed deep into Soviet territory, killing or capturing millions of soldiers and civilians, they did not achieve their main objectives of conquering the Soviet Union, Soviet resistance, and brutal winter weather stopped the German advance.

In 1942, Hitler narrowed his focus and concentrated his armies in the southern Soviet Union. His goal this time was to control the rich Caucasus oil fields. To achieve this objective, he would have to capture the city of Stalingrad.

The struggle for Stalingrad was especially ferocious. German troops advanced slowly, fighting bitter block-by-block, hour-by-hour battles in the bombed-out buildings and rubble. Soviet troops then counterattacked, trapping the German forces. Yet Hitler refused to allow his army

The invasion of Italy was a slow, grinding slog. Italy was crisscrossed with mountains and rivers. Heavy rains and mountains made combat difficult. Civilians fought in snide-deep mud. In the mountains, where tanks and heavy artillery were useless, Allied forces depended on mules to haul supplies up steep and steep roads. To make matters worse, the Germans occupied the best defensive positions. Fighting continued into 1945. The Allies won battles, but none were important enough to end the war in Italy.

Allied Bombers Attack Germany

Stalin continued his demand that Roosevelt and Churchill open a second front in France. While the Allies did not launch a massive invasion of France until 1944, they did open a second front of another kind in early 1942. From bases in England, Allied bombers launched nocturnal attacks against Germany.

Flying by night in order to avoid being shot down, in large numbers, British planes dropped massive amounts of bombs on German cities, including civilian targets. The goal of this saturation bombing was to inflict maximum damage.

By day, American bombers targeted Germany's key political and industrial centers. The goal of this campaign of strategic bombing was to destroy Germany's capacity to make war. A Nazi official later commented that “the fleets of bombers might appear at any time over any large German city or important factory.”

The bravery and contributions of an African American fighter squadron known as the Tuskegee Airmen played a key role in the campaign, escorting bombers and protecting them from enemy fighter planes. In more than 1,500 missions over enemy territory in Europe, the Tuskegee Airmen did not lose a single bomber.

Overall, though, the bombing missions cost the Allies dearly. Bomber crews suffered an incredibly high 20 percent casualty rate. But they successfully carried the war into Germany, day after day and night after night. This second front in the sky did indeed relieve some of the pressure on the Soviet armies on the Eastern Front and helped pave the way for an all-out Allied offensive.

**Turning Points in the Pacific**

While the Allies pursued their “Europe First” strategy, they did not ignore the Pacific. Through May 1942, Japanese forces continued to advance with seemingly unstoppable momentum. They had attacked America, Britain, and Dutch colonies, winning control of the Philippines, Malaya, Dutch East Indies, Hong Kong, Wake Island, Guam, and Bismarck. Then, the United States struck back. The American success at the Battle of Coral Sea in May 1942 served as a warning that the war in the Pacific was about to change.

**Americans Triumph at Midway**

Admiral Yamamoto, commander of Japanese forces in the Pacific, knew that the United States Navy was a powerful threat. Before the Americans could realize this Pearl Harbor, Yamamoto sought to destroy American aircraft carriers in the Pacific. He turned his attention to Midway, an American naval base in the Central Pacific that was vital to the defense of Hawaii. Losing Midway would force American defenses back to the California coast. Yamamoto’s ambitious plan entailed taking Midway and establishing a military presence in the Aleutians, a string of islands off the coast of Alaska.

What Yamamoto did not realize was that Admiral Chester Nimitz, commander of the United States Navy in the Pacific, knew the Japanese plan. U.S. Navy code breakers had intercepted Japanese messages. To meet the expected assault, Nimitz sent his own available aircraft carriers to Midway. The Japanese navy was astonished when more than a thousand miles, from the Aleutians to well west of Midway, American forces were all concentrated near Midway.

The Japanese began their attack on June 4, 1942. In the Battle of Midway, the most important naval battle of World War II, the United States dealt Japan a decisive defeat. American torpedo planes and dive bombers sank four Japanese aircraft carriers, along with all 260 aircraft on board and many of Japan’s most experienced pilots. America lost only one aircraft carrier.

Midway was the turning point of the war in the Pacific, ending the seemingly unstoppable Japanese advance. Japan still had a powerful navy, committed troops, and fortified positions. But Japanese forces would never again threaten Hawaii or dominate the Pacific. Japan was now on the defensive.

**Americans Take the Offensive**

The first American offensive in the Pacific took place in August 1942, with
