

The Lesson Internalization Protocol offers a structured approach to understanding each lesson comprehensively. This process helps teachers understand what students will learn, how their progress will be monitored, and to plan strategies to help all learners succeed.

Lesson Goals

1. Connect the lesson objective and essential understanding to the TEKS and ELPS.
2. Identify new vocabulary and related vocabulary previously taught.
3. Complete the practice and the Exit Ticket from a student point of view.
4. Identify prerequisite skills needed for the lesson's concepts.

Transition and Pacing of Lesson Parts

5. Note the suggested pacing of each lesson part and prepare to adjust it to meet the needs of the class.
6. Plan for a seamless progression between lesson parts.

Preparing to Teach the Lesson

7. Analyze how the lesson progression supports the lesson objectives.
8. Identify outcomes for each lesson part and align instructional decisions accordingly.
9. Identify formative assessment strategies given in the Teacher's Edition.
10. Plan for efficient distribution and collection of materials.
11. Organize student groupings for collaborative activities.
12. Note appropriate embedded supports to differentiate instruction.
13. Identify Differentiation Library resources aligned to the lesson.

Gather and Prepare Materials

14. Gather and prepare all required manipulatives and materials.
15. Determine and prepare digital resources required by the lesson.
16. Identify additional resources needed based on the classroom situation.
