High School Physical Sciences	
HS-PS1 Matter and Its Interactions	
Performance Expectation	
HS-PS1-3. Plan and conduct an investigation to gather evidence to compare the structure of substances at the bulk scale to infer the strength of electrical forces between particles.	**Student Experience Notebook:** SEP Plan an Investigation, 54 SEP Plan an Investigation, 163 SEP Plan an Investigation, 167 SEP Plan an Investigation, 170 SEP Plan an Investigation, 188 **Teacher Guide:** **Inquiry Labs:** Electric Charges and Coulomb's Law (95), Physical Properties of Solid Materials (156) **Digital Activities:** Properties of Materials (167), Structure and Function (163)
Science and Engineering Practices	
Planning and Carrying Out Investigations Planning and carrying out investigations in 9-12 builds on K-8 experiences and progresses to include investigations that provide evidence for and test conceptual, mathematical, physical, and empirical models.	
▪ Plan and conduct an investigation individually and collaboratively to produce data to serve as the basis for evidence, and in the design: decide on types, how much, and accuracy of data needed to produce reliable measurements and consider limitations on the precision of the data (e.g., number of trials, cost, risk, time), and refine the design accordingly. (HS-PS1-3)	**Student Experience Notebook:** SEP Plan an Investigation, 163 SEP Plan an Investigation, 167 SEP Plan an Investigation, 170 SEP Plan an Investigation, 188 **Teacher Guide:** **Inquiry Labs:** Electric Charges and Coulomb's Law (95), Physical Properties of Solid Materials (156) **Digital Activities:** Properties of Materials, (101), Attractive and Repulsive Forces,(150) Structure and Function (163) **Performance-Based Assessment:** Structure-Property Relationships (167)

Next Generation Science Standards High School DCI Arrangement	*Experience Physics,* © 2022
Disciplinary Core Ideas	
PS1.A: Structure and Properties of Matter	
▪ The structure and interactions of matter at the bulk scale are determined by electrical forces within and between atoms. (HS-PS1-3)	**Student Experience Notebook:** Electric Charge, 156 Electron, Protons, and Neutrons, 157 Electric Force, 158 Charge by Contact, 163 Charge by Induction, 164 Van der Waals Forces, 165 Modeling Electric and Contact Forces, 166 Periodic Physical Trends, 247 Coulomb Forces Between Atoms, 251 Covalent Bonds, 252 Metallic Bonds, 254 Other Atomic Interactions, 255 States of Matter, 256 Conductivity of Materials, 259 Stress and Strain, 260 Bulk Modulus, 262 Metallic Properties in Alloys, 264 Fracturing, 267 **Teacher Guide:** **Digital Activities:** Electric Forces (113), Structure and Function (163)
PS2.B: Types of Interactions	
▪ Attraction and repulsion between electric charges at the atomic scale explain the structure, properties, and transformations of matter, as well as the contact forces between material objects. (*secondary to HS-PS1-3*)	**Student Experience Notebook:** Electric Charge, 156 Electron, Protons, and Neutrons, 157 Electric Force, 158 Electric Force and Vectors, 160 Charge by Contact, 163 Charge by Induction, 164 Van der Waals Forces, 165 Modeling Electric and Contact Forces, 166 Periodic Physical Trends, 247 Coulomb Forces Between Atoms, 251 Covalent Bonds, 252 Metallic Bonds, 254 Other Atomic Interactions, 255 States of Matter, 256 Fracturing, 267 **Teacher Guide:** **Digital Activities:** Forces Between Atoms (149), Dielectric Materials (107), Electric Forces (113), Structure and Function (165)

Copyright © Savvas Learning Company LLC All Rights Reserved.

Next Generation Science Standards **High School** **DCI Arrangement**	***Experience Physics,*** **© 2022**
Crosscutting Concepts	
Patterns	
▪ Different patterns may be observed at each of the scales at which a system is studied and can provide evidence for causality in explanations of phenomena. (HS-PS1-3)	**Student Experience Notebook:** Van der Waals Forces, 165 Modeling Electric and Contact Forces, 166 SEP Develop and Use a Model, 195 CCC Patterns, 195 Periodic Physical Trends, 247 Coulomb Forces Between Atoms, 251 States of Matter, 256 CCC Structure and Function, 258 **Teacher Guide:** **Digital Activities:** Forces Between Atoms (149), Properties of Materials(167), Dielectric Materials (107)
Performance Expectation	
HS-PS1-8. Develop models to illustrate the changes in the composition of the nucleus of the atom and the energy released during the processes of fission, fusion, and radioactive decay.	**Student Experience Notebook:** SEP Develop Models, 591 SEP Develop Models, 592 SEP Develop Models, 596 SEP Develop Models, 598 SEP Develop and Use a Model, 615 SEP Develop and Use Models, 619 **Teacher Guide:** **Inquiry Lab:** Subatomic Particles (361) **Digital Activities:** Nuclear Physics (379), Fission and Fusion (373), Radioactive Decay (385) **Performance-Based Assessment:** Model Nuclear Forces (379)

Copyright © Savvas Learning Company LLC All Rights Reserved.

Next Generation Science Standards **High School** **DCI Arrangement**	***Experience Physics,*** **© 2022**
Science and Engineering Practices	
Developing and Using Models Modeling in 9–12 builds on K–8 and progresses to using, synthesizing, and developing models to predict and show relationships among variables between systems and their components in the natural and designed worlds.	
▪ Develop a model based on evidence to illustrate the relationships between systems or between components of a system. (HS-PS1-8)	**Student Experience Notebook:** SEP Develop Models, 571 Experience It, 584 SEP Develop Models, 591 SEP Develop Models, 592 SEP Develop and Use Models, 593 SEP Use Models, 596 SEP Develop and Use Models, 598 SEP Develop and Use a Model, 615 SEP Develop and Use Models, 616 SEP Develop and Use Models, 619 **Teacher Guide:** **Inquiry Labs:** Subatomic Particles (361), Forces and Atomic Nuclei (367) **Digital Activities:** Valley of Stability (367), Operate a Nuclear Fission Reactor (379), Nuclear Physics (379), Fission and Fusion (377), Radioactive Decay (388) **Engineering Workbench:** Energy Production (379) **Performance-Based Assessment:** Model Nuclear Forces (379)
Disciplinary Core Ideas	
PS1.C: Nuclear Processes	
▪ Nuclear processes, including fusion, fission, and radioactive decays of unstable nuclei, involve release or absorption of energy. The total number of neutrons plus protons does not change in any nuclear process. (HS-PS1-8)	**Student Experience Notebook:** Nuclear Mass and Energy, 575 Binding Energy, 584–586 Nuclear Stability, 587 Nuclear Instability, 589 Fusion, 603 CCC Energy and Matter, 604 Radioactivity, 610 Exponential Decay, 612 Alpha Decay and Cluster Decay, 614 Beta Decay and Electron Capture, 615 Gamma Decay, 616 Other Means of Radioactive Decay, 617 Radioactivity and the Valley of Stability, 618 Decay Series for Large Nuclei, 619

Next Generation Science Standards **High School** **DCI Arrangement**	***Experience Physics,*** **© 2022**
Crosscutting Concepts	
Energy and Matter	
▪ In nuclear processes, atoms are not conserved, but the total number of protons plus neutrons is conserved. (HS-PS1-8)	**Student Experience Notebook:** Nuclear Mass and Energy, 575 Weak Nuclear Force, 591 Converting Mass to Energy, 594–595 Fusion, 603 CCC Energy and Matter, 604 Beta Decay and Electron Capture, 615 Radioactivity and the Valley of Stability, 618 **Teacher Guide:** **Inquiry Labs:** Subatomic Particles (361)
HS-PS2 Motion and Stability: Forces and Interactions	
Performance Expectation	
HS-PS2-1. Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration.	**Student Experience Notebook:** Mowing the Lawn, 55 Modeling Force, 60 Writing Force-Acceleration Equations, 61 SEP Analyze and Interpret Data, 66 SEP Use Mathematics, 72 **Teacher Guide:** **Inquiry Lab:** Forces and Motion (37) **Digital Activities:** Force, Mass, and Acceleration (37), Sliding Down (61) **Performance-Based Assessment:** Force, Mass, and Acceleration (41)

Copyright © Savvas Learning Company LLC All Rights Reserved.

Next Generation Science Standards High School DCI Arrangement	***Experience Physics,* © 2022**
Science and Engineering Practices	
Analyzing and Interpreting Data Analyzing data in 9-12 builds on K-8 and progresses to introducing more detailed statistical analysis, the comparison of data sets for consistency, and the use of models to generate and analyze data.	
▪ Analyze data using tools, technologies, and/or models (e.g., computational, mathematical) in order to make valid and reliable scientific claims or determine an optimal design solution. (HS-PS2-1)	**Student Experience Notebook:** Dot Diagrams, 11 Position Graphs, 12 Speed and Velocity, 13 SEP Analyze and Interpret Data, 13 Speed and Velocity Graphs, 15 SEP Argue from Evidence, 15 SEP Analyze and Interpret Data, 20 Graphs of Changing Velocity, 22 Acceleration, 23 SEP Analyze and Interpret Data, 34 Projectile Motion, 38 SEP Analyze and Interpret Data, 64 SEP Analyze and Interpret Data, 66 **Teacher Guide:** **Inquiry Labs:** Motion Plots (11), Free Fall Acceleration (18), Forces and Motion (37), The Buoyant Force (43), Friction(49), Model Projectile Motion (25) **Digital Activities:** Acceleration(19), Fast Cars (18), Satellites in Circular Orbits (26), Types of Forces (46), Vehicle Stopping Distance (43), Coin Drop (31) **Performance-Based Assessment:** Speed, Acceleration, and Trajectory (31)
Connections to Nature of Science	
Science Models, Laws, Mechanisms, and Theories Explain Natural Phenomena	
▪ Theories and laws provide explanations in science. (HS-PS2- 1)	**Student Experience Notebook:** Changing Motion, 52 Force Causes an Acceleration, 54 Spring Force, 67 Launching a Satellite, 129 Kepler's Laws, 142 Current and Resistivity, 189 SEP Obtain, Evaluate, and Communicate Information, 199 The Atom, 242 The First Law of Thermodynamics, 376 Lenses, 501 **Teacher Guide:** **Digital Activities:** Modeling Motion(31); Acceleration On a Ramp (19); Circular and Projectile Motion (29); Horizontal Motion of Falling Objects (27); Force, Mass, and Acceleration in Action (38); Pinball Launcher Model (44) **Engineering Workbench:** Design an Airdrop System (31)

Copyright © Savvas Learning Company LLC All Rights Reserved.

Next Generation Science Standards **High School** **DCI Arrangement**	***Experience Physics,*** **© 2022**
▪ Laws are statements or descriptions of the relationships among observable phenomena. (HS-PS2-1)	**Student Experience Notebook:** Changing Motion, 52 Force Causes an Acceleration, 54 Spring Force, 67 Launching a Satellite, 129 Kepler's Laws, 142 Current and Resistivity, 189 SEP Obtain, Evaluate, and Communicate Information, 199 The Atom, 242 The First Law of Thermodynamics, 376 Lenses, 501 **Teacher Guide:** **Digital Activities:** Modeling Motion (31), Acceleration On a Ramp (22), Circular and Projectile Motion (26), Horizontal Motion of Falling Objects (27), Force, Mass, and Acceleration in Action (37), Pinball Launcher Model (44) **Engineering Workbench:** Design an Airdrop System (31)
Disciplinary Core Ideas	
PS2.A: Forces and Motion	
▪ Newton's second law accurately predicts changes in the motion of macroscopic objects. (HS-PS2-1)	**Student Experience Notebook:** Force Causes an Acceleration, 54 Momentum, 56 Representing Forces, 58 Solving Two-Dimensional Force Problems, 73 Forces in Systems, 80 Determining Internal Forces, 82 Atwood Machine, 87
Crosscutting Concepts	
Cause and Effect	
▪ Empirical evidence is required to differentiate between cause and correlation and make claims about specific causes and effects. (HS-PS2-1)	**Student Experience Notebook:** CCC Cause and Effect, 5 CCC Cause and Effect, 48 CCC Cause and Effect, 51 CCC Cause and Effect, 52 CCC Scale, Proportion, and Quantity, 54 CCC Cause and Effect, 70 SEP Argue from Evidence, 71 CCC Cause and Effect, 76 CCC Cause and Effect, 78 CCC Cause and Effect, 80 CCC Cause and Effect, 94 **Teacher Guide:** **Inquiry Lab:** Model Projectile Motion (25), **Digital Activities:** Forces (61), Forces on Systems (49), Atmospheric Pressure on a Sealed Container (50) **Performance-Based Assessment:** Speed, Acceleration, and Trajectory (31)

Next Generation Science Standards High School DCI Arrangement	***Experience Physics,* © 2022**
Performance Expectation	
HS-PS2-2. Use mathematical representations to support the claim that the total momentum of a system of objects is conserved when there is no net force on the system.	**Student Experience Notebook:** SEP Argue from Evidence, 331 Conserving Momentum in Space, 332 Conserving Angular Momentum, 333 SEP Use Models, 333 Impulse-Momentum Theorem, 336 Impulse and Momentum in Collisions, 338 SEP Use Mathematics, 343 A Ballistic Pendulum, 344 Inelastic Collision, 346 **Teacher Guide:** **Digital Activity:** Minimizing Car Crash Injuries (219)
Science and Engineering Practices	
Using Mathematics and Computational Thinking Mathematical and computational thinking at the 9-12 level builds on K-8 and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.	
▪ Use mathematical representations of phenomena to describe explanations. (HS-PS2-2)	**Student Experience Notebook:** SEP Use Mathematics, 323 SEP Use Mathematics, 324 SEP Use Mathematics, 327 SEP Construct an Explanation, 328 SEP Use Mathematics, 329 Conserving Momentum in Space, 332 A Rotating Disk and a Hoop Interact, 334–335 SEP Use Mathematics, 336 What a Racket, 340 High-Speed Collision, 341 A Ballistic Pendulum, 344–345 Inelastic Collision, 346 **Teacher Guide:** **Inquiry Labs:** Momentum and Impulse During Collisions (201), Elastic and Inelastic Collisions (207) **Digital Activities:** Momentum and Impulse (202), Momentum and Baseball (202), Minimizing Car Crash Injuries (219) **Engineering Workbench:** Egg Supply Drop (219); **Performance-Based Assessment:** Build Your Own Egg-Transport Vehicle (219)
Disciplinary Core Ideas	
PS2.A: Forces and Motion	
▪ Momentum is defined for a particular frame of reference; it is the mass times the velocity of the object. (HS-PS2-2)	**Student Experience Notebook:** Momentum, 56 Momentum and Impulse, 322 Net Momentum, 324 Angular Momentum, 326 Conserving Momentum in Space, 332

Copyright © Savvas Learning Company LLC All Rights Reserved.

Next Generation Science Standards **High School** **DCI Arrangement**	***Experience Physics,*** **© 2022**
▪ If a system interacts with objects outside itself, the total momentum of the system can change; however, any such change is balanced by changes in the momentum of objects outside the system. (HS-PS2-2)	**Student Experience Notebook:** Impulse-Momentum Theorem, 336–337 Impulse and Momentum in Collisions, 338–339 What A Racket, 340 High-Speed Collision, 341 Types of Collisions, 342–343 A Ballistic Pendulum, 344–345 Inelastic Collision, 346 **Teacher Guide:** **Digital Activity:** Minimizing Car Crash Injuries (219) **Performance-Based Assessment:** Build Your Own Egg-Transport Vehicle (219)
Crosscutting Concepts	
Systems and System Models	
▪ When investigating or describing a system, the boundaries and initial conditions of the system need to be defined. (HS-PS2-2)	**Student Experience Notebook:** Net Momentum, 324 SEP Use Mathematics, 324 Angular Momentum, 326 SEP Develop a Model, 326 Conservation of Momentum, 330 SEP Develop Models, 330 Impulse and Momentum in Collisions, 338 SEP Argue from Evidence, 338 Comparing Momenta in Systems, 339 Types of Collisions, 342 **Teacher Guide:** **Digital Activities:** Momentum and Baseball (202), Kinetic Energy and Collisions (208) **Engineering Workbench:** Egg Supply Drop (219)
Performance Expectation	
HS-PS2-3. Apply scientific and engineering ideas to design, evaluate, and refine a device that minimizes the force on a macroscopic object during a collision.[1*]	**Student Experience Notebook:** SEP Construct an Explanation, 347 Investigation Assessment, 363 **Teacher Guide:** **Digital Activity:** Minimizing Car Crash Injuries (219) **Engineering Workbench:** Egg Supply Drop (219) **Performance-Based Assessment:** Build Your Own Egg-Transport Vehicle (219)

[1*] The performance expectations marked with an asterisk integrate traditional science content with engineering through a Practice or Disciplinary Core Idea.

Next Generation Science Standards High School DCI Arrangement	***Experience Physics,* © 2022**
Disciplinary Core Ideas	
PS3.A: Definitions of Energy	
▪ Energy is a quantitative property of a system that depends on the motion and interactions of matter and radiation within that system. That there is a single quantity called energy is due to the fact that a system's total energy is conserved, even as, within the system, energy is continually transferred from one object to another and between its various possible forms. (HS-PS3-1)	**Student Experience Notebook:** Potential Energy, 294 Gravitational Potential Energy, 295 Elastic Potential Energy, 296–297 Cart on a Spring, 298–299 Electromagnetic Potential Energy, 300–301 Mechanical Energy and Work, 302 Mechanical Energy Bar Charts, 303 Bowling Ball Bounce, 304–305 Friction as a Change in Energy, 306 Car Skidding to a Stop, 307–308
PS3.B: Conservation of Energy and Energy Transfer	
▪ Conservation of energy means that the total change of energy in any system is always equal to the total energy transferred into or out of the system. (HS-PS3-1)	**Student Experience Notebook:** Energy Bar Charts, 289 Work Done on a Book, 290–291 Power, 292 Mechanical Energy Bar Charts, 303 Friction as a Change in Energy, 306 Energy–A Conserved Quantity, 309 Modeling Systems, 311 Expanded Work-Energy Theorem, 312 Energy Transformed Within a System, 313 Roller Coaster Energy, 314–315 Power–The Rate of Energy Transfer, 316–317
▪ Energy cannot be created or destroyed, but it can be transported from one place to another and transferred between systems. (HS-PS3-1)	**Student Experience Notebook:** Potential Energy, 294 Gravitational Potential Energy, 295 Elastic Potential Energy, 296–297 Cart on a Spring, 298–299 Mechanical Energy and Work, 302 Mechanical Energy Bar Charts, 303 Bowling Ball Bounce, 304–305 Friction as a Change in Energy, 306 Car Skidding to a Stop, 307–308 Expanded Work-Energy Theorem, 312 CCC Energy and Matter, 318 **Digital Activity:** Rocket Launch (195)
▪ Mathematical expressions, which quantify how the stored energy in a system depends on its configuration (e.g. relative positions of charged particles, compression of a spring) and how kinetic energy depends on mass and speed, allow the concept of conservation of energy to be used to predict and describe system behavior. (HS-PS3-1)	**Student Experience Notebook:** Gravitational Potential Energy, 295 Elastic Potential Energy, 296–297 Cart on a Spring, 298–299 Electromagnetic Potential Energy, 300–301 Mechanical Energy Bar Charts, 303 Bowling Ball Bounce, 304–305 Friction as a Change in Energy, 306

Disciplinary Core Ideas	
PS3.C: Relationship Between Energy and Forces	
▪ When two objects interacting through a field change relative position, the energy stored in the field is changed. (HS-PS3-5)	**Student Experience Notebook:** What is a Field? 171 Parallel Plates, 178 Magnetic Fields, 203 Modeling Multiple Magnets, 205 Magnetic Fields From Moving Charges, 206 Force on a Moving Charge, 207 Magnetic Force on a Wire, 213–214 Modeling Earth's Magnetic Field, 224 Pole Reversals, 225 Electrostatic Potential Energy, 410 Energy Transformation, 411 Energy Changes in Systems with Electric Charges, 412–413 Electric Potential Field, 414 Point Charges, 415 Superposition, 416 Potential Due to Pint Charges, 417 Equipotential Surfaces, 418 Potential Difference, 419 Alternating Current Generators, 436 Direct Current Generators, 437 Motors, 439 Induction Devices, 442–443
Crosscutting Concepts	
Cause and Effect	
▪ Cause and effect relationships can be suggested and predicted for complex natural and human designed systems by examining what is known about smaller scale mechanisms within the system. (HS-PS3-5)	**Student Experience Notebook:** Electromotive Force, 229 Electromagnetic Energy, 409 What Causes Current? 421 Electric Generators, 435 Induction Devices, 442 **Teacher Guide:** **Digital Activities:** Junkyard Electromagnet (273), Electric Potential (249), Potential Difference in a Battery (250), Energy in Electric Circuits (255), Electric Circuits (255), Magnetic Forces (122), Combining Magnetic Fields (128)

HS-PS4 Waves and Their Applications in Technologies for Information Transfer	
Performance Expectation	
HS-PS4-1. Use mathematical representations to support a claim regarding relationships among the frequency, wavelength, and speed of waves traveling in various media.	**Student Experience Notebook:** SEP Analyze Data, 467 SEP Use Mathematics, 467 SEP Analyze and Interpret Data, 469 SEP Argue F\from Evidence, 471 **Teacher Guide:** **Inquiry Lab:** Mechanical Waves (283) **Digital Activities:** Making Waves (303), Properties of Waves (283), Waves and Shallow Water (283)
Science and Engineering Practices	
Using Mathematics and Computational Thinking Mathematical and computational thinking at the 9-12 level builds on K-8 and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.	
▪ Use mathematical representations of phenomena or design solutions to describe and/or support claims and/or explanations. (HS-PS4-1)	**Student Experience Notebook:** SEP Analyze Data, 467 SEP Use Mathematics, 467 SEP Analyze and Interpret Data, 469 Wave on a Rope, 470 Properties of Sound Waves, 474 Modeling a Sound Wave, 476–477 SEP Use Mathematics, 478 SEP Analyze and Interpret Data, 478 A Passing Ambulance, 481 SEP Develop a Model, 482 SEP Develop a Model, 483 SEP Use Mathematics, 484 Standing Waves on a Rope, 487 SEP Analyze and Interpret Data, 489 SEP Use Mathematics, 490 SEP Use Mathematics, 492 SEP Use Mathematics, 499 SEP Use Computational Thinking, 504 Image of a Rubber Duck, 505 Reading with a Magnifying Glass, 506–507 **Teacher Guide:** **Inquiry Labs:** Mechanical Waves (283), Interference of Sound Waves (289); **Digital Activities:** Making Waves (303), Properties of Waves (283), Waves and Shallow Water (283) **Performance-Based Assessment:** The Speed of Sound in Open Air (303)

Next Generation Science Standards High School DCI Arrangement	*Experience Physics,* © 2022
Disciplinary Core Ideas	
PS4.A: Wave Properties	
▪ The wavelength and frequency of a wave are related to one another by the speed of travel of the wave, which depends on the type of wave and the medium through which it is passing. (HS-PS4-1)	**Student Experience Notebook:** Properties of Waves, 467 Transverse Waves, 468–470 Wave Speed at an Interface, 471 Longitudinal Waves, 472–474 Modeling Waves, 475 Moving Wave Source, 480–481 Standing Waves, 485–487 Energy in Waves, 490–492 **Teacher Guide:** **Inquiry Lab:** Mechanical Waves (283) **Digital Activity:** Properties of Waves (283)
Crosscutting Concepts	
Cause and Effect	
▪ Empirical evidence is required to differentiate between cause and correlation and make claims about specific causes and effects. (HS-PS4-1)	**Student Experience Notebook:** SEP Analyze and Interpret Data, 469 CCC Cause and Effect, 475 SEP Construct an Explanation, 491 SEP Develop and Use a Model, 498 **Teacher Guide:** **Inquiry Labs:** Mechanical Waves (283), Interference of Sound Waves (289), Reflection and Refraction (295) **Digital Activities:** Waves (303), Making Waves (303), Properties of Waves (283), Wave Speed (286), Wave Behavior and Energy (292), Interference (290), Wave Optics (297), Refraction (296) **Engineering Workbench:** Waves (303)
Performance Expectation	
HS-PS4-2. Evaluate questions about the advantages of using digital transmission and storage of information.	**Student Experience Notebook:** Storing Pictures in Digital Code, 543 Storing Sounds in Digital Code, 544 Computer Memory, 545 Advantages and Disadvantages of Digital Information, 547 Investigating Phenomenon, 548 **Teacher Guide:** **Inquiry Lab:** Binary Logic (333) **Digital Activity:** Music Storage for Home Recording (351) **Performance-Based Assessment:** Send Messages with a Telegraph (351)

Science and Engineering Practices	
Asking Questions and Defining Problems Asking questions and defining problems in grades 9-12 builds from grades K-8 experiences and progresses to formulating, refining, and evaluating empirically testable questions and design problems using models and simulations.	
▪ Evaluate questions that challenge the premise(s) of an argument, the interpretation of a data set, or the suitability of a design. (HS-PS4-2)	**Student Experience Notebook:** SEP Ask Questions, 547 **Teacher Guide:** **Inquiry Lab:** Binary Logic (333) **Digital Activity:** Music Storage for Home Recording (351) **Engineering Workbench:** Rover (351)
Disciplinary Core Ideas	
PS4.A: Wave Properties	
▪ Information can be digitized (e.g., a picture stored as the values of an array of pixels); in this form, it can be stored reliably in computer memory and sent over long distances as a series of wave pulses. (HS-PS4-2)	**Student Experience Notebook:** Representing Information Digitally, 542 Storing Pictures in Digital Code, 543 Storing Sounds in Digital Code, 544 Computer Memory, 545 Advantages and Disadvantages of Digital Information, 547 Audio Information, 549 Visual Information, 550–551 Medical Imaging, 552–553 Antennas, 554–555 **Teacher Guide:** **Digital Activity:** Music Storage for Home Recording (351) **Engineering Workbench:** Rover (351)
Crosscutting Concepts	
Stability and Change	
▪ Systems can be designed for greater or lesser stability. (HS-PS4-2)	**Student Experience Notebook:** Storing Pictures in Digital Code, 543 Computer Memory, 545 Advantages and Disadvantages of Digital Information, 547 **Teacher Guide:** **Digital Activity:** Music Storage for Home Recording (351) **Performance-Based Assessment:** Send Messages with a Telegraph (351)

Science and Engineering Practices	
Engaging in Argument from Evidence Engaging in argument from evidence in 9-12 builds on K-8 experiences and progresses to using appropriate and sufficient evidence and scientific reasoning to defend and critique claims and explanations about natural and designed worlds. Arguments may also come from current scientific or historical episodes in science.	
▪ Evaluate the claims, evidence, and reasoning behind currently accepted explanations or solutions to determine the merits of arguments. (HS-PS4-3)	**Student Experience Notebook:** SEP Analyze and Interpret Data, 489 SEP Argue from Evidence, 489 SEP Argue from Evidence, 502 SEP Argue from Evidence, 508 SEP Analyze and Interpret Data, 509 SEP Engage in Argument from Evidence, 509 SEP Argue from Evidence, 513 SEP Argue from Evidence, 515 SEP Construct an Argument, 516 SEP Use Evidence, 528 **Teacher Guide:** **Inquiry Labs:** Diffraction (309), Particle Nature of Light (315); **Digital Activities:** Electromagnetic Radiation (327), Particle-Wave Duality of Light (327), Laser Interference (312), Particle-Wave Duality (315), Light Intensity and Energy (316)
Connections to Nature of Science	
Science Models, Laws, Mechanisms, and Theories Explain Natural Phenomena	
▪ A scientific theory is a substantiated explanation of some aspect of the natural world, based on a body of facts that have been repeatedly confirmed through observation and experiment and the science community validates each theory before it is accepted. If new evidence is discovered that the theory does not accommodate, the theory is generally modified in light of this new evidence. (HS-PS4-3)	**Student Experience Notebook:** Energy in Waves, 490–492 Diffraction, 494–495 Refraction, 498–500 Formation of Images, 502–503 Intensity of Polarized Light, 518–519 Shortcomings of the Wave Theory, 520–521 Photoelectric Effect, 522 **Teacher Guide:** **Digital Activities:** Electromagnetic Waves and Their Properties (309), Laser Interference (312), Particle-Wave Duality (315), Light Intensity and Energy (318)

Next Generation Science Standards High School DCI Arrangement	*Experience Physics,* © 2022
Disciplinary Core Ideas	
PS4.A: Wave Properties	
▪ Waves can add or cancel one another as they cross, depending on their relative phase (i.e., relative position of peaks and troughs of the waves), but they emerge unaffected by each other. (Boundary: The discussion at this grade level is qualitative only; it can be based on the fact that two different sounds can pass a location in different directions without getting mixed up.) (HS-PS4-3)	**Student Experience Notebook:** Modeling Wave Interactions, 482–483 Beats, 484 Standing Waves, 485 Waves on a String, 486–487 Diffraction, 494–495 Lenses, 501 Formation of Images, 502–503 **Teacher Guide:** **Digital Activity:** Electromagnetic Waves and Their Properties (309)
PS4.B: Electromagnetic Radiation	
▪ Electromagnetic radiation (e.g., radio, microwaves, light) can be modeled as a wave of changing electric and magnetic fields or as particles called photons. The wave model is useful for explaining many features of electromagnetic radiation, and the particle model explains other features. (HS-PS4-3)	**Student Experience Notebook:** Diffraction, 494–495 Reflection, 496–497 Refraction, 498–500 Lenses, 501 Formation of Images, 502–503 The Lens Equation, 504 Image of a Rubber Duck, 505 Reading with a Magnifying Glass, 506–507 **Teacher Guide:** **Inquiry Lab:** Particle Nature of Light (315)
Crosscutting Concepts	
Systems and System Models	
▪ Models (e.g., physical, mathematical, computer models) can be used to simulate systems and interactions—including energy, matter, and information flows—within and between systems at different scales. (HS-PS4-3)	**Student Experience Notebook:** SEP Develop a Model, 482 SEP Develop a Model, 483 SEP Use a Model, 491 SEP Develop a Model, 508 CCC Systems and System Models, 511 SEP Develop a Model, 519 SEP Develop a Model, 521 SEP Use a Model, 522 SEP Develop a Model, 528 **Teacher Guide:** **Digital Activities:** Electromagnetic Waves and Their Properties (309), Particle-Wave Duality (315)

Next Generation Science Standards High School DCI Arrangement	*Experience Physics,* © 2022
Performance Expectation	
HS-PS4-4. Evaluate the validity and reliability of claims in published materials of the effects that different frequencies of electromagnetic radiation have when absorbed by matter.	**Student Experience Notebook:** SEP Evaluate Claims, 521 **Teacher Guide:** **Inquiry Lab:** Electromagnetic Radiation and Matter (322); **Digital Activity:** Sunscreen and UV Protection (323); **Performance-Based Assessment:** Clothing and Sun Protection (327)
Science and Engineering Practices	
Obtaining, Evaluating, and Communicating Information Obtaining, evaluating, and communicating information in 9-12 builds on K-8 and progresses to evaluating the validity and reliability of the claims, methods, and designs.	
▪ Evaluate the validity and reliability of multiple claims that appear in scientific and technical texts or media reports, verifying the data when possible. (HS-PS4-4)	**Student Experience Notebook:** SEP Evaluate Claims, 535 SEP Evaluate Claims, 536 **Teacher Guide:** **Inquiry Lab:** Electromagnetic Radiation and Matter (322); **Digital Activity:** Sunscreen and UV Protection (323); **Performance-Based Assessment:** Clothing and Sun Protection (327)
Disciplinary Core Ideas	
PS4.B: Electromagnetic Radiation	
▪ When light or longer wavelength electromagnetic radiation is absorbed in matter, it is generally converted into thermal energy (heat). Shorter wavelength electromagnetic radiation (ultraviolet, X-rays, gamma rays) can ionize atoms and cause damage to living cells. (HS-PS4-4)	**Student Experience Notebook:** Photon-Electron Interactions, 529 Photon Energy Absorption by Matter, 530–531 Blackbody Radiation, 532–533 Damage to Living Cells, 534–536 **Teacher Guide:** **Inquiry Lab:** Electromagnetic Radiation and Matter (322); **Digital Activity:** EM Radiation and Matter (325)
Crosscutting Concepts	
Cause and Effect	
▪ Cause and effect relationships can be suggested and predicted for complex natural and human designed systems by examining what is known about smaller scale mechanisms within the system. (HS-PS4-4)	**Student Experience Notebook:** Effects of UV Exposure, 534–536 **Teacher Guide:** **Performance-Based Assessment:** Clothing and Sun Protection (327)

Next Generation Science Standards **High School** **DCI Arrangement**	***Experience Physics,*** **© 2022**
Performance Expectation	
HS-PS4-5. Communicate technical information about how some technological devices use the principles of wave behavior and wave interactions with matter to transmit and capture information and energy.[4*]	**Student Experience Notebook:** CCC Energy and Matter, 549 SEP Construct Explanations, 552 SEP Construct Explanations (21), 556 SEP Construct Explanations (23), 556 **Teacher Guide:** **Inquiry Labs:** Converting Electrical Signals to Sounds (339), Converting Sunlight to Electricity (345); **Digital Activities:** Antennas (342), Solar Panels on a Cloudy Day (346); **Performance-Based Assessment:** Send Messages with a Telegraph (351)
Science and Engineering Practices	
Obtaining, Evaluating, and Communicating Information Obtaining, evaluating, and communicating information in 9-12 builds on K-8 and progresses to evaluating the validity and reliability of the claims, methods, and designs.	
▪ Communicate technical information or ideas (e.g. about phenomena and/or the process of development and the design and performance of a proposed process or system) in multiple formats (including orally, graphically, textually, and mathematically). (HS-PS4-5)	**Student Experience Notebook:** SEP Argue From Evidence, 489 SEP Construct an Explanation, 492 SEP Argue From Evidence, 513 SEP Argue From Evidence, 515 SEP Construct an Explanation, 531 SEP Obtain Information, 555 SEP Construct Explanations, 559 SEP Construct an Argument, 561 **Teacher Guide:** **Inquiry Labs:** Reflection and Refraction (295), Converting Electrical Signals to Sounds (339), Converting Sunlight to Electricity (345) **Engineering Workbench:** Rover (351)
Disciplinary Core Ideas	
PS3.D: Energy in Chemical Processes	
▪ Solar cells are human-made devices that likewise capture the sun's energy and produce electrical energy. *(secondary to HS-PS4-5)*	**Student Experience Notebook:** Capturing an EM Wave Energy, 557 Energy from the Sun, 558 Solar Panels, 559 Efficiency of Solar Power, 560 **Teacher Guide:** **Inquiry Lab:** Converting Sunlight to Electricity (345)

[4*] The performance expectations marked with an asterisk integrate traditional science content with engineering through a Practice or Disciplinary Core Idea.

PS4.B Electromagnetic Radiation	
▪ Atoms of each element emit and absorb characteristic frequencies of light. These characteristics allow identification of the presence of an element, even in microscopic quantities. *(secondary to HS-ESS1-2)*	**Student Experience Notebook:** Photon Energy Absorption by Matter, 530 Big Bang Nucleosynthesis, 685 **Teacher Guide:** **Inquiry Lab:** Elemental Composition of Stars (415) **Engineering Workbench:** The Colors of Light (427)
Crosscutting Concepts	
Energy and Matter	
▪ Energy cannot be created or destroyed-only moved between one place and another place, between objects and/or fields, or between systems. (HS-ESS1-2)	**Student Experience Notebook:** Evidence for the Big Bang, 679 Expansion and the Age of the Universe, 680–681 A Model of the Big Bang, 682 Cosmic Microwave Background, 683 Recombination and Light, 684 Big Bang Nucleosynthesis, 685 History of the Universe, 686–687 Dark Energy, 688
Connections to Engineering, Technology, and Applications of Science	
Interdependence of Science, Engineering, and Technology	
▪ Science and engineering complement each other in the cycle known as research and development (R&D). Many R&D projects may involve scientists, engineers, and others with wide ranges of expertise. (HS-ESS1-2)	**Student Experience Notebook:** Expansion and the Age of the Universe, 680–681 Cosmic Microwave Background, 683 Big Bang Nucleosynthesis, 685
Connections to Nature of Science	
Scientific Knowledge Assumes an Order and Consistency in Natural Systems	
▪ Scientific knowledge is based on the assumption that natural laws operate today as they did in the past and they will continue to do so in the future. (HS-ESS1-2)	**Student Experience Notebook:** Impact Craters and Solar System History, 634 Grand Canyon, 636 Physical and Geologic Time, 636–637 Geologic Time Divisions, 644–645 Ages of Ocean Crust, 646–647 **Teacher Guide:** **Digital Activity:** Origins of the Universe (422)
▪ Science assumes the universe is a vast single system in which basic laws are consistent. (HS-ESS1-2)	**Student Experience Notebook:** Impact Craters and Solar System History, 634 Grand Canyon, 636 Physical and Geologic Time, 636–637 Geologic Time Divisions, 644–645 Ages of Ocean Crust, 646–647 **Teacher Guide:** **Digital Activity:** Origins of the Universe (422)

Connections to Nature of Science	
Science Models, Laws, Mechanisms, and Theories Explain Natural Phenomena	
▪ A scientific theory is a substantiated explanation of some aspect of the natural world, based on a body of facts that have been repeatedly confirmed through observation and experiment and the science community validates each theory before it is accepted. If new evidence is discovered that the theory does not accommodate, the theory is generally modified in light of this new evidence. (HS-ESS1-6)	**Student Experience Notebook:** pp. 625, 631, 633, 644 **Teacher Guide:** **Inquiry Labs:** Radiometric Dating of Rocks (391), Half-Life Simulation (385)
▪ Models, mechanisms, and explanations collectively serve as tools in the development of a scientific theory. (HS-ESS1-6)	**Student Experience Notebook:** True Ages, 625 Formation of the Solar System, 631 Formation of Earth and the Moon, 633 CCC Stability and Change, 644 **Teacher Guide:** **Inquiry Labs:** Radiometric Dating of Rocks (391), Half-Life Simulation (385)
Disciplinary Core Ideas	
ESS1.C: The History of Planet Earth	
▪ Although active geologic processes, such as plate tectonics and erosion, have destroyed or altered most of the very early rock record on Earth, other objects in the solar system, such as lunar rocks, asteroids, and meteorites, have changed little over billions of years. Studying these objects can provide information about Earth's formation and early history. (HS-ESS1-6)	**Student Experience Notebook:** The Oldest Rocks on Earth, 629 Meteorites and Solar Spectroscopy, 630 Formation of Earth and the Moon, 633 Impact Craters and Solar System History, 634 Physical and Geologic Time, 636–637 Sea Level Changes, 641–642 Geologic Time Divisions, 644 Ages of Ocean Crust, 646–647
PS1.C: Nuclear Processes	
▪ Spontaneous radioactive decays follow a characteristic exponential decay law. Nuclear lifetimes allow radiometric dating to be used to determine the ages of rocks and other materials. (*secondary to HS-ESS1-6*)	**Student Experience Notebook:** Radioactivity, 610 Exponential Decay, 612–613 Radioactivity and the Valley of Stability, 618 Decay Series for Large Nuclei, 619 Radiometric Dating, 622 Carbon-14 Age Dating, 623 Calibrating C-14, 624–625 Radiometric Dating of Charcoal, 626 Age Dating Older Rocks, 627 Uranium-Lead Dating, 628 **Teacher Guide:** **Inquiry Lab:** Radiometric Dating of Rocks (391)

Crosscutting Concepts	
Stability and Change	
▪ Change and rates of change can be quantified and modeled over very short or very long periods of time. Some system changes are irreversible. (HS-ESS2-1)	**Student Experience Notebook:** Time Scales of Geologic Processes, 98–99 Weathering, 100 Physical and Geologic Time, 636–637 Continuous vs. Catastrophic, 638 Relative Time, 639 Physical and Geologic Time, 636–637 Continuous vs. Catastrophic, 638 Relative Time, 639 Sea Level Changes, 641–642 **Teacher Guide:** **Inquiry Lab:** Plate Tectonics and Seafloor Spreading (397) **Digital Activity:** Seafloor Spreading (397)
Performance Expectation	
HS-ESS2-3. Develop a model based on evidence of Earth's interior to describe the cycling of matter by thermal convection.	**Student Experience Notebook:** SEP Use Mathematics, 400 CCC Systems and System Models, 404 **Teacher Guide:** **Inquiry Lab:** Convection, Conduction, and Radiation (237); **Digital Activity:** Convection Currents (239)
Science and Engineering Practices	
Developing and Using Models Modeling in 9-12 builds on K-8 experiences and progresses to using, synthesizing, and developing models to predict and show relationships among variables between systems and their components in the natural and designed world(s).	
▪ Develop a model based on evidence to illustrate the relationships between systems or between components of a system. (HS-ESS2-3)	**Student Experience Notebook:**: pp. 395, 396, 400, 401, 402–405 **Teacher Guide:** **Inquiry Lab:** Convection, Conduction, and Radiation (237) **Digital Activities**: Convection Currents (239), Heat Flow Within Earth (241)
Connections to Nature of Science	
Scientific Knowledge is Based on Empirical Evidence	
▪ Science knowledge is based on empirical evidence. (HS-ESS2-3)	**Student Experience Notebook:** Probing Earth's Interior, 396 Earth's Composition, 397 Seismic Tomography, 403 Mantle Convection and Plate Tectonics, 404 Core Convection and Magnetism, 405 **Teacher Guide:** **Digital Activity:** Heat Flow on Earth's Surfaces (238)

Copyright © Savvas Learning Company LLC All Rights Reserved.

Next Generation Science Standards **High School** **DCI Arrangement**	***Experience Physics,*** **© 2022**
▪ Science disciplines share common rules of evidence used to evaluate explanations about natural systems. (HS-ESS2-3)	**Student Experience Notebook:** Probing Earth's Interior, 396 Earth's Composition, 397 Seismic Tomography, 403 Mantle Convection and Plate Tectonics, 404 Core Convection and Magnetism, 405 **Teacher Guide:** **Digital Activity:** Heat Flow on Earth's Surfaces (238)
▪ Science includes the process of coordinating patterns of evidence with current theory. (HS-ESS2-3)	**Student Experience Notebook:** Probing Earth's Interior, 396 Earth's Composition, 397 Seismic Tomography, 403 Mantle Convection and Plate Tectonics, 404 Core Convection and Magnetism, 405 **Teacher Guide:** **Digital Activity:** Heat Flow on Earth's Surfaces (238)
Disciplinary Core Ideas	
ESS2.A: Earth Materials and Systems	
▪ Evidence from deep probes and seismic waves, reconstructions of historical changes in Earth's surface and its magnetic field, and an understanding of physical and chemical processes lead to a model of Earth with a hot but solid inner core, a liquid outer core, a solid mantle and crust. Motions of the mantle and its plates occur primarily through thermal convection, which involves the cycling of matter due to the outward flow of energy from Earth's interior and gravitational movement of denser materials toward the interior. (HS-ESS2-3)	**Student Experience Notebook:** Heat Flow at Earth's Surface, 394–395 Probing Earth's Interior, 396 Earth's Composition, 397 Earth's Temperature and Heat, 398–399 Heat Conduction and Melting, 400–401 Mantle Convection, 402–403 Mantle Convection and Plate Tectonics, 404 Core Convection and Magnetism, 405
ESS2.B: Plate Tectonics and Large-Scale System Interactions	
▪ The radioactive decay of unstable isotopes continually generates new energy within Earth's crust and mantle, providing the primary source of the heat that drives mantle convection. Plate tectonics can be viewed as the surface expression of mantle convection. (HS-ESS2-3)	**Student Experience Notebook:** Heat Flow and Plate Tectonics, 395 Sources of Energy, 399 Mantle Convection and Plate Tectonics, 404 Radioactivity, 610
PS4.A: Wave Properties	
▪ Geologists use seismic waves and their reflection at interfaces between layers to probe structures deep in the planet. (*secondary to HS-ESS2-3*)	**Student Experience Notebook:** Probing Earth's Interior, 396 Seismic Tomography, 403 Mantle Convection and Plate Tectonics, 404

Science and Engineering Practices	
Engaging in Argument from Evidence Engaging in argument from evidence in 9-12 builds on K-8 experiences and progresses to using appropriate and sufficient evidence and scientific reasoning to defend and critique claims and explanations about natural and designed world(s). Arguments may also come from current scientific or historical episodes in science.	
▪ Evaluate competing design solutions to a real-world problem based on scientific ideas and principles, empirical evidence, and logical arguments regarding relevant factors (e.g. economic, societal, environmental, ethical considerations). (HS-ESS3-2)	**Student Experience Notebook:** CCC Cause and Effect, 454 SEP Argue from Evidence, 455 SEP Construct an Explanation (62), 456 SEP Construct an Argument, 459 SEP Argue from Evidence, 460 SEP Construct an Explanation, 460 SEP Communicate Information, 461 **Teacher Guide:** **Digital Activity:** Resource Use and Biodiversity Tradeoffs (267) **Engineering Workbench:** Energy Sources: Costs and Benefits (273) **Performance-Based Assessment:** Design, Build, and Refine A Wind-Turbine Rotor (273)
Disciplinary Core Ideas	
ESS3.A: Natural Resources	
▪ All forms of energy production and other resource extraction have associated economic, social, environmental, and geopolitical costs and risks as well as benefits. New technologies and social regulations can change the balance of these factors. (HS-ESS3-2)	**Student Experience Notebook:** Energy Use, Population, and Impact, 446 Impacts on the Biosphere, 447 Impact Reduction, 448 Costs and Benefits, 452 Costs and Benefits of Renewable Energy, 453 Costs and Benefits: Oil, Gas, and Coal, 454 Costs and Benefits: Wind, Solar, and Biomass, 455 Costs and Benefits: Hydroelectric, Geothermal, Tides, and Waves, 456 Costs and Benefits: Nuclear Power, 457 Sustainable Energy Future, 458–459 Energy from the Sun, 558
ETS1.B: Developing Possible Solutions	
▪ When evaluating solutions, it is important to take into account a range of constraints, including cost, safety, reliability, and aesthetics, and to consider social, cultural, and environmental impacts. (*secondary to HS-ESS3-2*)	**Student Experience Notebook:** Human Power Needs, 449-450 Energy Storage Technologies, 451 Costs and Benefits, 452 Costs and Benefits of Renewable Energy, 453 Sustainable Energy Future, 458–459 Energy from the Sun, 558

Connections to Engineering, Technology, and Applications of Science	
Influence of Engineering, Technology, and Science on Society and the Natural World	
▪ Engineers continuously modify these technological systems by applying scientific knowledge and engineering design practices to increase benefits while decreasing costs and risks. (HS-ESS3-2)	**Student Experience Notebook:** Annual Load Management, 450 Energy Storage Technologies, 451 Costs and Benefits, 452–453 Costs and Benefits: Oil, Gas, and Coal, 454 Costs and Benefits: Wind, Solar, and Biomass, 455 Costs and Benefits: Hydroelectric, Geothermal, Tides, and Waves, 456 Costs and Benefits: Nuclear Power, 457 Sustainable Energy Future, 458–459 **Teacher Guide:** **Digital Activity:** Junkyard Electromagnet (273)
▪ Analysis of costs and benefits is a critical aspect of decisions about technology. (HS-ESS3-2)	**Student Experience Notebook:** Annual Load Management, 450 Energy Storage Technologies, 451 Costs and Benefits, 452–453 Costs and Benefits: Oil, Gas, and Coal, 454 Costs and Benefits: Wind, Solar, and Biomass, 455 Costs and Benefits: Hydroelectric, Geothermal, Tides, and Waves, 456 Costs and Benefits: Nuclear Power, 457 Sustainable Energy Future, 458–459 **Teacher Guide:** **Digital Activity:** Junkyard Electromagnet (273)
Connections to Nature of Science	
Science Addresses Questions About the Natural and Material World	
▪ Science and technology may raise ethical issues for which science, by itself, does not provide answers and solutions. (HS-ESS3-2)	**Student Experience Notebook:** Human Use of Energy, 445–446 Costs and Benefits, 452–453 Sustainable Energy Future, 458–459 **Teacher Guide:** **Digital Activity:** Resource Use and Biodiversity Tradeoffs (267)
▪ Science knowledge indicates what can happen in natural systems—not what should happen. The latter involves ethics, values, and human decisions about the use of knowledge. (HS-ESS3-2)	**Student Experience Notebook:** Human Use of Energy, 445–446 Costs and Benefits, 452–453 Sustainable Energy Future, 458–459 **Teacher Guide:** **Digital Activity:** Resource Use and Biodiversity Tradeoffs (267)

Next Generation Science Standards **High School** **DCI Arrangement**	***Experience Physics,*** **© 2022**
▪ Many decisions are not made using science alone, but rely on social and cultural contexts to resolve issues. (HS-ESS3-2)	**Student Experience Notebook:** Human Use of Energy, 445–446 Costs and Benefits, 452–453 Sustainable Energy Future, 458–459 **Teacher Guide:** **Digital Activity:** Resource Use and Biodiversity Tradeoffs (267)
Performance Expectation	
HS-ESS3-3. Create a computational simulation to illustrate the relationships among the management of natural resources, the sustainability of human populations, and biodiversity.	**Student Experience Notebook:** SEP Use Mathematics, 446 SEP Analyze Data, 446 CCC Cause and Effect, 448 Impact Reduction, 448 **Teacher Guide:** **Inquiry Lab:** Natural Resource Management (267) **Engineering Workbench:** Energy Sources: Costs and Benefits (273)
Science and Engineering Practices	
Using Mathematics and Computational Thinking Mathematical and computational thinking in 9-12 builds on K-8 experiences and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.	
▪ Create a computational model or simulation of a phenomenon, designed device, process, or system. (HS-ESS3-3)	**Student Experience Notebook:** SEP Use Mathematics, 446 SEP Analyze Data, 446 CCC Cause and Effect, 448 Impact Reduction, 448 SEP Use Mathematics, 452 SEP Use Mathematics, 457 SEP Use Mathematics, 460 **Teacher Guide:** **Inquiry Lab:** Natural Resource Management (267) **Digital Activity:** Impact Reduction (270)
Disciplinary Core Ideas	
ESS3.C: Human Impacts on Earth Systems	
▪ The sustainability of human societies and the biodiversity that supports them requires responsible management of natural resources. (HS-ESS3-3)	**Student Experience Notebook:** Human Use of Energy, 445–446 Impacts on the Biosphere, 447 Sustainable Energy Future, 458–459 **Teacher Guide:** **Digital Activity:** Resource Use and Biodiversity Tradeoffs (267)
