

iLit Translation Tool

Students can enhance their independent reading in the iLit Library by using the embedded translation tool. With support for 102 languages—27 of which include audio—this makes reading more accessible for your students. Continue reading to learn the steps for accessing the translation tool.

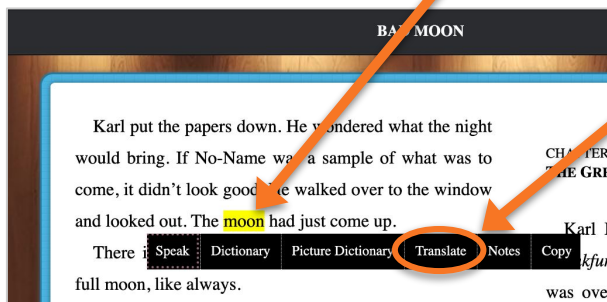

1 Select Language

Click the *Translate* button.

Select one of the languages from the list. Note that Spanish is the default language.

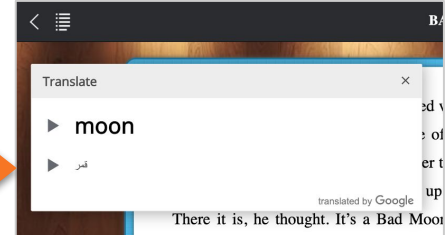

2 Translate One Word

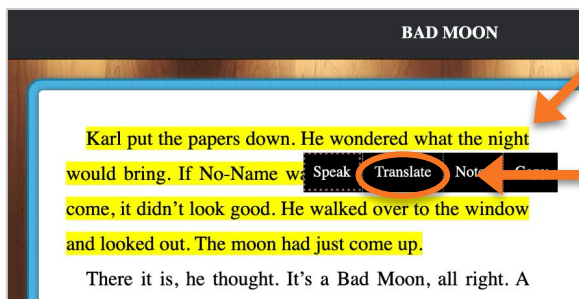

Click on a word in the text that you want to translate.

From the menu, select *Translate*.

Students can then read the translation of the selected word. If audio support is available for that language, click the *Play* button to have the translation read aloud.

3 Translate One Paragraph

Double-click any word in the paragraph that you want to translate.

From the menu, select *Translate*.

Students can then read the translation of the selected paragraph. If audio support is available for that language, click the *Play* button to have the translation read aloud.
