

COLLABORATIVE PROJECTS

1

TEAMWORK

As a group, discuss your plan before you start. Your teacher may direct you to choose a topic for your project. If so, listen to everyone's ideas and the reasons for their ideas. Negotiate so that there is something that everyone likes about the topic you choose.

2

MAKE A PROJECT PLAN

List every part of your project. Decide which parts all members of the group will work on. Also decide which parts individuals will work on. Be sure you consider every part and identify who is responsible for each one.

3

MAKE A PLAN FOR PRESENTING

Decide who will present each part of the project. Be sure that everyone has a fairly equal role during the presentation. Make a plan for rehearsing your presentation before you deliver it.

4

BE RESPECTFUL

Respect the ideas and opinions of everyone in your group. Encourage everyone to contribute.

5

INCLUDE EVERYONE

Be sure to include everyone all of the time. Everyone is equal in the group.

6

DO YOUR PART

When you are working in a group, it is important to do your part of the project and the presentation. Each person is responsible for the project's success.
